

DRDP Dates *for* Early Intervention and Preschool Special Education

Beginning of the school year:

Initiate observations of children's skills and behaviors for the DRDP (2015).

In October:

Focus on those measures for which you have not yet gathered observations. **Observations should be current** with child's skills and progress.

In December:

Complete an *Information Page/Rating Record* for each child, ensuring that observations are current (during six week period prior to data submission).

By January 1:

Check with local administrators for the date when DRDP data must be submitted. **For District and SELPA Administrators: DRDP data is submitted to CASEMIS.**

To be included in the fall assessment, children must begin services before October 1.

By January 1, all special education teachers and service providers should complete all *DRDP (2015) Rating Records* and check with their local administrators as to how, when, and to whom DRDP data will be submitted.
