

DRDP Dates *for* Early Intervention and Preschool Special Education

During January and February:

Continue observations of children's skills and behaviors for the DRDP (2015).

In March:

Focus on those measures for which you have not yet gathered observations. Observations should be current with child's skills and progress.

In April:

Complete an *Information Page/Rating Record* for each child, ensuring that observations are current (during six week period prior to data submission).

By June 1:

Check with local administrators for the date when DRDP data must be submitted. For District and SELPA Administrators: DRDP data is submitted to CASEMIS.

*To be included in the spring assessment, children must begin services before **March 1**.*

By June 1, all special education teachers and service providers should complete all *DRDP (2015) Rating Records* and check with their local administrators as to how, when, and to whom DRDP data will be submitted.

Remember to generate Child Progress Reports to see how children have progressed and to inform instruction.
