DRDP (2015)
An Early Childhood Developmental Continuum
Preschool Fundamental View

for use with preschool-age children
The DRDP (2015) was developed by the California Department of Education, Early Learning and Care Division and Special Education Division, with assistance from:
Berkeley Evaluation and Assessment Research Center, University of California, Berkeley
Desired Results Access Project, Napa County Office of Education
Desired Results Training and Technical Assistance Project, WestEd’s Center for Child and Family Studies

The DRDP (2015) is available at the California Department of Education Website at www.cde.ca.gov/sp/cd/ci/drdpforms.asp

Introduction to the DRDP (2015)

Welcome to the Desired Results Developmental Profile (2015) [DRDP (2015)]: An Early Childhood Developmental Continuum. The DRDP (2015) is a formative assessment instrument developed by the California Department of Education for young children and their families used to inform instruction and program development.

Key Features of the DRDP (2015):

• The DRDP (2015) is administered in natural settings through teacher observations, family observations, and examples of children's work. Ongoing documentation of children's knowledge and skills in everyday environments is a recommended practice for early childhood assessment.

• The DRDP (2015) represents a full continuum of development from early infancy up through early kindergarten. It has two views: the Infant/Toddler view for use with children in infant/toddler programs, and the Preschool View, for children in preschool programs.

• The Preschool View has two forms: The Comprehensive View containing domains related to all areas of the Preschool Learning Foundations; and the Fundamental View, associated with essential domains of school readiness.

• The DRDP (2015) is designed for use with all children from early infancy up to kindergarten entry, including children with Individualized Family Service Plans (IFSPs) and Individualized Education Programs (IEPs).

• The DRDP (2015) is aligned with all volumes of the California's Infant/Toddler and Preschool Learning and Development Foundations, the Common Core Standards, and the Head Start Child Development and Early Learning Framework.

• The DRDP (2015) takes into consideration the specific cultural and linguistic characteristics of California's diverse population of young children, with specific consideration for children who are young dual language learners (see section below).

• The DRDP (2015) was developed with the goal of ensuring that all children have the opportunity to demonstrate their knowledge and skills. To enable access to the assessment for diverse populations, the principles of Universal Design were followed.

• The DRDP (2015) includes domains that meet the federal Office of Special Education Programs (OSEP) child outcome reporting requirements for children with Individualized Family Service Plans (IFSPs) or Individualized Education Programs (IEPs).

Information about Selected Key Features

Three of these key features: (1) consideration of young children who are dual language learners, (2) universal design and adaptations for children with IFSPs and IEPs, and (3) a detailed description of the developmental domains that make up the instrument, are described in more detail to help teachers and service providers better understand and rate the measures of the DRDP (2015).

Young Dual Language Learners and the DRDP (2015)

Dual language learners are children learning two or more languages at the same time, as well as those children learning a second language while continuing to develop their first (or home) language. A child's experience with one or more languages is an asset to build on in the early childhood setting. It is critical to consider the child's communication in all the languages that he or she is learning in order to have an accurate picture of a child's knowledge and skills. Young children, including children with disabilities, can successfully learn two or more languages. Learning two or more languages has linguistic, social, cognitive, academic, and cultural benefits. The path to learning one language shares many similarities with the path to learning two or more languages. There are also differences that must be taken into consideration when assessing young children who are dual language learners. Children may have vocabulary for concepts in one language and vocabulary for other concepts in another language. So it is important to assess children in all of the languages he or she understands and uses. The DRDP (2015) addresses cultural and linguistic responsiveness in two primary ways:

1. Teachers and service providers observe and document children's behavior in both the home language and English to obtain a more accurate profile of the children's knowledge and skills across developmental domains.

2. Teachers and service providers rate children's progress on two language development domains. The Language and Literacy Development (LLD) domain assesses all children's progress in developing foundational language and literacy skills where ratings should be based on skills in all languages. The English-Language Development (ELD) domain assesses current knowledge and skills and progress in learning to communicate in English.

Universal Design and the DRDP (2015)

In the context of assessment, "Universal Design" refers to the development of assessments that are appropriate for all children to the greatest extent possible. Universal Design allows children the opportunity to demonstrate their knowledge and skills in a variety of ways. All young children are entitled access to, and meaningful participation in, age-appropriate, individually-appropriate and culturally-appropriate early childhood curricula and assessments. Teachers and service providers support children's access and participation by identifying and providing learning opportunities, materials, and teaching strategies in flexible and individualized ways and through a variety of learning modalities. DRDP (2015) assessors apply universal design when they carefully consider the various ways young children can demonstrate knowledge or skills that reflect mastery of a developmental level.
The Eight Domains of the DRDP (2015)

The DRDP (2015) is made up of eight domains. The focus of each domain is on the acquisition of knowledge, skills, or behaviors that reflect each domain's developmental constructs. The domains and sub-domains of the Fundamental View, essential to school readiness, are marked with an asterisk (*).

Approaches to Learning—Self-Regulation* (ATL-REG)
The ATL-REG domain assesses two related areas that are recognized as important for young children’s school readiness and success: Approaches to Learning and Self-Regulation. These areas have been combined into one domain because of the strong connections between them. The Approaches to Learning skills include attention maintenance, engagement and persistence, and curiosity and initiative. The Self-Regulation skills include self-comforting, self-control of feelings and behavior, imitation, and shared use of space and materials.

Social and Emotional Development* (SED)
The SED domain assesses children's developing abilities to understand and interact with others and to form positive relationships with nurturing adults and their peers. The knowledge or skill areas in this domain include identity of self in relation to others, social and emotional understanding, relationships and social interactions with familiar adults, relationships and interactions with peers, and symbolic and sociodramatic play.

Language and Literacy Development* (LLD)
The LLD domain assesses the progress of all children in developing foundational language and literacy skills. These skills can be demonstrated in any language and in any mode of communication. Language and literacy skills in a child's first language form the foundation for learning English. Therefore, dual language learners may demonstrate knowledge and skills in their home language, in English, or in both languages. LLD measures should be completed for all infants, toddlers, and preschool-age children, including those who are dual language learners.

English-Language Development* (ELD)
The ELD domain assesses the progress of children who are dual language learners in learning to communicate in English. The developmental progression described in the four ELD measures is related to the child's experiences with English, not the child's age. Keep in mind that children acquire English in different ways and at different rates. Factors that affect English acquisition include degree of exposure to English, level of support provided in their home/first language, and individual differences such as age of exposure to English or the structure of the child's home/first language. The ELD measures should be completed only for preschool-age children whose home language is other than English.

Cognition, Including Math* and Science (COG)
The COG domain focuses on observation, exploration of people and objects, and investigation of objects and concepts. The knowledge or skill areas in this domain include spatial relationships, cause and effect, classification, number sense of quantity, number sense of math operations, measurement, patterning, shapes, inquiry through observation and investigation, documentation and communication of inquiry, and knowledge of the natural world.

Physical Development—Health* (PD-HLTH)
The PD-HLTH domain assesses motor development and the development of routines related to personal care, safety, and nutrition. The knowledge or skill areas in this domain include perceptual-motor skills and movement concepts, gross locomotor movement skills, gross motor manipulative skills, fine motor manipulative skills, active physical play, nutrition, safety, and personal care routines (hygiene, feeding, dressing).

History-Social Science (HSS)
The HSS domain focuses on learning about the expectations of social situations, how to participate within a group, and the relationship between people and the environment in which they live. The knowledge or skill areas in this domain include sense of time, sense of place, ecology, conflict negotiation, and responsible conduct.

Visual and Performing Arts (VPA)
The VPA domain focuses on awareness and engagement in four areas of artistic expression. The knowledge or skill areas in this domain include visual art, music, drama, and dance.

About the Measures of the DRDP (2015)
The levels for each DRDP (2015) measure describe a developmental continuum, ranging from earlier developing to later developing competencies. The DRDP (2015) includes three types of continua:

- **Full Continuum Measures**: describe development from early infancy to early kindergarten. These measures should be used with all infants, toddlers, and preschool-age children.

- **Earlier Development Measures**: describe development that typically occurs from early infancy through early preschool ages and may be used with preschool-age children under specific conditions (identified as Conditional measures).

- **Later Development Measures**: describe development that typically occurs from early preschool ages to early kindergarten. These measures should be used with all preschool-age children.
Conditional Measures for Preschool-Age Children

Some measures in the DRDP Preschool View are considered conditional measures that are only assessed when certain conditions are met. These measures should be used if they assist teachers and service providers in planning a child’s learning activities and supports, and documenting progress.

Conditional measures are used in three instances:
- If a preschool child has not developmentally moved beyond the four earlier-development measures.
- If a language other than English is spoken in the child’s home.
- If the child is still working on the health measures (required for all children with IEPs).

Please note that the Earlier Development Measures, and the Physical Development and Health measures are required for children with IEPs.

</table>

*Guidance for rating ELD measures for children who are dual language learners is provided in the section, "Young Dual Language Learners and the DRDP (2015)" on page Intro-2.

The Developmental Levels

The number of levels in a measure varies depending on the competencies that are appropriate for that measure's developmental continuum. The levels are organized under four categories from early infancy up to kindergarten entry: Responding, Exploring, Building, and Integrating:

**Responding (Earlier, Later)**
Knowledge, skills, or behaviors that develop from basic responses (through using senses and through actions) to differentiated responses. Children generally engage in back-and-forth interactions with familiar adults and communicate through nonverbal messages.

**Exploring (Earlier, Middle, Later)**
Knowledge, skills, or behaviors that include active exploration including purposeful movement, purposeful exploration and manipulation of objects, purposeful communication, and the beginnings of cooperation with adults and peers. Children generally begin this period by using nonverbal means to communicate and, over time, grow in their ability to communicate verbally or use other conventional forms of language.

**Building (Earlier, Middle, Later)**
Knowledge, skills, or behaviors that demonstrate growing understanding of how people and objects relate to one another, how to investigate ideas, and how things work. Children use language to express thoughts and feelings, to learn specific early literacy and numeracy skills, and to increasingly participate in small group interactions and cooperative activities with others.

**Integrating (Earlier)**
Knowledge, skills, or behaviors that demonstrate the ability to connect and combine strategies in order to express complex thoughts and feelings, solve multi-step problems, and participate in a wide range of activities that involve social-emotional, self-regulatory, cognitive, linguistic, and physical skills. Children begin to engage in mutually supportive relationships and interactions.

Note that the developmental levels for the ELD domain differ from the above format as they represent the developmental progression for the acquisition of English as a second language during the early childhood years.
Definitions of Terms in the Navigation Maps

**Developmental Domain:** A crucial area of learning and development for children.

**Measure:** The developmental continuum along which a child’s observed behavior is assessed. Measures are the individual assessment items in the DRDP.

- **Full Continuum Measure:** Describes development from early infancy to early kindergarten.
- **Early Development Measure:** Describes development that typically occurs in infant/toddler and preschool years.
- **Later Development Measure:** Describes development that typically occurs in the preschool years and early kindergarten.

**Definition:** Specifies the aspects of development to be observed.

**Developmental Level:** A point along a developmental progression for a particular measure that ranges from earlier to later levels of development.

**Descriptor:** Defines the behaviors that would be observed for a child at that developmental level.

**Example:** Specific behaviors you might see that would demonstrate that a child has reached mastery of a particular developmental level. Note that the examples provided in the DRDP are not the only way a child can demonstrate mastery of a developmental level.

---

**Example of a Full Continuum Measure**

**Developmental Domain:** Physical Development - Gross Motor Skills

**Mark the latest developmental level the child has mastered:**

<table>
<thead>
<tr>
<th>Earlier</th>
<th>Later</th>

</tbody>
</table>

**Possible Examples:**
- Sits up and reaches for a toy.
- Rolls over in bed or on the floor.
- Pulls up to standing position.
- Pushes up with hands and then shifts to sitting position.

**Descriptors:**
- Puts hands to mouth
- Pulls self up with support
- Puts hands behind head
- Pulls up to standing position
- Pulls up to standing position, moves into sitting position
- Pushes with hands, head, and then sits up

**Examples:**
- Sits up with support and attempts to pull self to sitting position
- Puts hands to mouth
- Pulls self up with support
- Puts hands behind head
- Pushes up to standing position

---

**Example of a Later Developmental Measure**

**Developmental Domain:** Language & Cognitive Development - Emergent Literacy

**Mark the latest developmental level the child has mastered:**

<table>
<thead>
<tr>
<th>Earlier</th>
<th>Later</th>

**Possible Examples:**
- Responds with a smile or a nod
- Responds with a line of talk

**Descriptors:**
- Names familiar objects
- Names pictures

**Examples:**
- Responds with a smile or a nod
- Responds with a line of talk
The 3 Steps to Completing the DRDP (2015)

**Step 1: Observation and Documentation**

The DRDP (2015) focuses on the child’s behavior, knowledge, and skills. To capture a child’s behavior, the DRDP (2015) incorporates observation in natural settings.

While observing and collecting documentation, remember that words, phrases, and sentences can be communicated and understood in a variety of ways, including spoken in the child’s home language, signed, and through other communication modes (e.g., via a communication device). The teacher’s and service provider’s direct observations of a child are the primary method used to inform ratings and they should also use other sources of evidence to capture a more complete picture of a child’s knowledge and skills. Other sources of evidence include the following:

- **Observations by others** – including teachers, family members/caregivers, and other service providers or caregivers, obtained through interview or conversations
- **Other documentation** – including samples of children’s work, photographs, and video/audio recordings of children’s communication and behavior

**Observations should occur over time, in typical settings:**
- In the child’s typical program or settings such as child care, classrooms, or home;
- As the child interacts in familiar environments and routines with people he or she knows; and
- As the child engages in typical activities and routines.

**The Important Role of Families in the Documentation Process**

Family members have repeated opportunities to observe their child’s activities and interactions over time and in a variety of situations. Their perspectives, combined with teachers’ and service providers’ observations, provide a more complete and reliable picture of a child’s typical behaviors. Inviting family members to share observations of their child’s development and behavior is a recommended practice for the DRDP (2015). The opportunity to observe a child’s level of mastery is greatest when the child is interacting with a familiar adult. Because of this, it is helpful to observe a child interacting with family members. This is especially true for children who are new to a program or at the earliest levels (Responding Earlier and Responding Later). These observations can inform assessment decisions for all domains. They are particularly important for the SED and LLD domains since social interaction and communication skills are learned through repeated interactions with familiar adults.

**Observation and Documentation for Young Dual Language Learners**

Young dual language learners may demonstrate knowledge and skills in their home language, in English, or in both languages. They may also code-switch, which is using more than one language within a conversation. Therefore, communication in all languages the child uses should be considered when collecting documentation and completing the measures in all domains. The adult who is conducting observations and collecting documentation should speak the child’s home language. If not, the adult must receive assistance from another adult, who does speak the child’s home language. This may be an assistant teacher, director, parent, or other adult who knows the child.

**Dual Language Learners’ Use of Code Switching**

- Code switching is the use of multiple languages within a single conversation. It is a typical feature of learning two or more languages.
- As early as three years of age, children code switch to playfully experiment with the two languages and to serve their own social and communication goals. For example, children may code switch to emphasize or elaborate a point.
- Children might code switch when speaking with one person, or may use one language exclusively with one person and another language with another person.
- When children mix their two languages they use the grammatical rules of each language. For example, “I want leche” (“I want milk”) is an example of inserting a Spanish noun into a grammatically correct English sentence.

**Using Adaptations**

Adaptations are changes in the environment or differences in observed behavior that allow children with IFSPs or IEPs to demonstrate their knowledge and skills in typical environments. Seven broad categories of adaptations have been identified for children with IFSPs and IEPs for the DRDP (2015).

- The adaptations listed in the table below have been developed so that the assessment will more accurately measure a child’s abilities rather than the impact of a child’s disability (a more detailed description of the adaptations appears in Appendix D). Adaptations must be in place for the child during the normal course of the day, and they should also be in place during observations for the DRDP (2015). Everyone working with the child should be informed of any adaptations the child uses.
- New adaptations must not be introduced solely for the purpose of conducting the DRDP (2015) assessment.
- Consideration of adaptations should be made on a regular basis from early infancy and as the child develops and grows.
What is Mastery?
A developmental level is mastered if the child demonstrates the knowledge, skills, and behaviors defined at that level:

- Consistently over time
- In different situations or settings

Important notes about mastery:
- Children may demonstrate mastery of knowledge and skills through a variety of communication modes, languages, and behaviors.
- Many of the behaviors that you observe in determining a child's mastery level may not appear on the list of examples, although they are consistent with the descriptor.

Seven Categories of Adaptations

Augmentative or Alternative Communication System
Methods of communication other than speech that allow a child who is unable to use spoken language to communicate with others.

Alternative Mode for Written Language
Methods of reading or writing used by a child who cannot see well enough to read or write or cannot hold and manipulate a writing utensil (e.g., pencil, pen) well enough to produce written symbols.

Visual Support
Adjustments to the environment that provide additional information to a child who has limited or reduced visual input.

Assistive Equipment or Device
Tools that make it possible or easier for a child to perform a task.

Functional Positioning
Strategic positioning and postural support that allow a child to have increased control of his body.

Sensory Support
Increasing or decreasing sensory input to facilitate a child's attention and interaction in the environment.

Alternative Response Mode
Recognition that a child might demonstrate mastery of a skill in a unique way that differs from the child's typically developing peers.

Step 2: Rating the Measures

Determining the Child's Latest Level of Mastery
For each of the measures, determine the latest developmental level the child has mastered, and mark it appropriately.

The Descriptors and Examples
Consider the descriptors first, and then the examples, to determine which developmental level is most consistent with your observations and other documentation of the child's typical behavior. A child may demonstrate behaviors at more than one developmental level. Choose the level that most closely represents the knowledge, skills, or behaviors the child demonstrates most consistently.

Descriptors:
The descriptors define the knowledge, skills, or behaviors expected at each level along the developmental continuum of the measure (see Navigation Maps). Each descriptor is illustrated by several examples of behaviors that are consistent with that developmental level.

Most of the descriptors define discrete knowledge, skills, or behaviors. However, some include more than one behavior or skill, separated by “and,” “or,” or a semicolon (;) followed by “and.”

If the descriptor includes “or”:
The child only needs to demonstrate the behavior in one of the listed ways to demonstrate mastery for the developmental level. Either part of the descriptor may be observed to rate mastery at that level.

- For example, the descriptor for Exploring Later in LLD 5: Interest in Literacy is:
  Looks at books on own briefly or Chooses to join reading, singing, or rhyming activities led by an adult

If the child EITHER looks at books on own briefly OR chooses to join reading, singing, or rhyming activities led by an adult, mastery can be rated at this level.
If a descriptor includes "and":
All parts of the descriptor are required for mastery and need to be observed together.
- For example, the descriptor for Building Earlier in ATL-REG 2: Self-Comforting is:
  *Anticipates need for comfort and prepares self by asking questions, getting a special thing, or in other ways.*

The child needs to demonstrate both anticipating a need for comfort and preparing self during the same observation.

If a descriptor includes a semi-colon (;) followed by "and":
The child must demonstrate all the behaviors listed to rate the level as mastered, but not necessarily during the same observation within a DRDP rating period.
- For example, the descriptor for Exploring Later in SED 3: Relationships and Social Interactions with Familiar Adults is:
  *Initiates activities with familiar adults; and Seeks out assistance or support from familiar adults.*

To be rated as mastered at this level, the child must BOTH initiate activities with familiar adults AND seek out assistance or support from familiar adults. The assessor does not have to observe both behaviors during the same observation within a DRDP rating period.

Please note that key terms and phrases in the descriptors that may be new or have specific meaning to the measures are defined in the Glossary at the end of the instrument.

Examples:
Keep in mind these important points about examples:
- The examples are not a checklist of what the child must demonstrate to be rated at mastery of the knowledge, skills, or behaviors that reflect a developmental level.
- An example is one of many possible ways a child might demonstrate mastery of a developmental level. Teachers and service providers will identify other examples as they conduct their observations.
- Mastery is determined over time and across situations or settings.
- A child may not demonstrate any of the specific examples provided for a developmental level, but may demonstrate mastery in other ways that are consistent with the intent of the descriptor.
- Children demonstrate mastery in diverse and sometimes unique ways.
- Examples have not been written to include all areas of disability. Universal design is intended to support the inclusion of children with disabilities on the DRDP (2015). However, it is important to review the adaptations as well as understand the construct being measured when assessing children with disabilities.

Additional Rating Options

Emerging to the Next Developmental Level:
If your observations indicate that the child has demonstrated mastery for a developmental level and is also beginning to demonstrate knowledge, skills, or behaviors described for the next level (although not yet consistently across situations or settings), the child may be emerging to the next level.

To indicate emerging:
- First, mark the developmental level the child has mastered.
- Then, mark “emerging” if the child also demonstrates behaviors described for the next developmental level.

Notes about Emerging:
- You may mark emerging when rating full-continuum measures with infants and toddlers if the child has mastered the last level that can be rated and the child demonstrates some behaviors in the level that follows.
- Do not mark emerging if the child has mastered the latest level on a measure.
- Marking that the child is emerging to the next level does not affect the rating of mastery for the measure.

Child is Not Yet at the Earliest Developmental Level on a Later Development Measure:
If, after careful consideration, you determine that a preschool-age child is not yet demonstrating mastery of the earliest level of a later development measure, mark “Child is not yet at the earliest developmental level on this measure.”

Unable to Rate due to extended absence:
- This is used only when the child is absent from the program for such an extended period of time during the four to six weeks prior to submitting your DRDP data that you could not gather information to rate the measures.
- The following are NOT valid reasons to indicate Unable to Rate:
  - Not having enough time or enough information
  - The nature of a child’s disability or the severity of a child’s disability

The Responding Earlier level is designed to be inclusive of all children. Mark this earliest level unless the child demonstrates skills at a later level. Do not use Unable to Rate because you feel a child does not demonstrate the skills for the earliest level.
Rating Conditional Measures

If you are using the conditional measures for a preschool-age child, mark them on the Rating Record according to the following guidance:

<table>
<thead>
<tr>
<th>Measure</th>
<th>How to Mark the DRDP</th>
</tr>
</thead>
<tbody>
<tr>
<td>Earlier Development Measures</td>
<td></td>

<tr>
<td>PD-HLTH 7: Personal Care Routines: Feeding</td>
<td>• If these measures are rated, determine the level of mastery and mark accordingly</td>
</tr>
<tr>
<td>PD-HLTH 8: Personal Care Routines: Dressing</td>
<td>• If these measures are not rated, check the box, “I did not rate this measure because it is not used for documenting progress or planning this child’s learning activities and supports”</td>
</tr>
</tbody>
</table>

⇒ Step 3: Finalize the Assessment

To finalize, simply review the assessment to make sure that you have entered a rating for all of the measures and that the Information Page is complete and up-to-date:

- For Early Learning and Care Division (ELCD) programs: enter your ratings into DRDP Online.
- For Special Education Division (SED) programs: enter your ratings into your SELPA’s MIS system. Check with your administrator for when and to whom your Rating Records are due.
## Child Information

2. **Statewide Student Identifier** (10-digit SSID) 

3. **Agency Identifier**  
   (agency identifier and statewide student identifier can be the same)

4. **Child's classroom or setting**

5. **Birth date** (mm/dd/yyyy) _____ / _____ / ________

6. **Gender**  
   - [ ] Male  
   - [ ] Female

7. **Initial date of enrollment in early childhood program** (mm/dd/yyyy) _____ / _____ / ________  
   **Date child was withdrawn from the program** (mm/dd/yyyy) _____ / _____ / ________

8a. **What is this child's ethnicity?**  
   - [ ] Yes, Hispanic or Latino  
   - [ ] No, not Hispanic or Latino

8b. **What is this child's race?** Mark one or more races to indicate what this child considers himself/herself to be.  
   - [ ] Asian Indian  
   - [ ] Black or African-American  
   - [ ] Cambodian  
   - [ ] Chinese  
   - [ ] Filipino  
   - [ ] Guamanian  
   - [ ] Hawaiian  
   - [ ] Hmong  
   - [ ] Japanese  
   - [ ] Intentionally left blank  
   - [ ] Korean  
   - [ ] Laotian  
   - [ ] Native American  
   - [ ] Other Asian  
   - [ ] Other Pacific Islander  
   - [ ] Samoan  
   - [ ] Tahitian  
   - [ ] Vietnamese  
   - [ ] White

11. **Date DRDP (2015) was completed** (mm/dd/yyyy) _____ / _____ / ________

12. **Assessment period** (e.g., Spring 2020)

## Observer Information

9. **Agency** _______________________________  
   **Site** _______________________________

10. **Your name** ____________________________  
    **Title** _______________________________

11. **Are you the primary teacher working with this child?**  
    - [ ] Yes  
    - [ ] No (specify your relationship to the child) ____________________________________________

12. **Did another adult assist you with assessing this child?**  
    - [ ] Yes (role/relation): ____________________________________________________________  
    - [ ] No  
    - [ ] Not applicable (I understand and use the child's home language)

## Child's Language Information

13. **Child's home language(s)**

14. **Is a language other than English spoken in the child's home?**  
    - [ ] Yes  
    - [ ] No  

15. **Did someone who understands and uses the child's home language assist you with completing the observation?**  
    - [ ] Yes, role/relation: ____________________________________________________________  
    - [ ] No  
    - [ ] Not applicable (I understand and use the child's home language)

16. **Child is enrolled in:** Check all that apply.  
   - [ ] State Infant/Toddler Program  
   - [ ] State Preschool  
   - [ ] Migrant  
   - [ ] Head Start  
   - [ ] First 5  
   - [ ] Early Head Start  
   - [ ] Title 1  
   - [ ] Child Care Center  
   - [ ] Family Child Care Home  
   - [ ] Other

17. **Does this child have an Individualized Education Program (IEP) or an Individualized Family Service Plan (IFSP)?**  
   - [ ] Yes  
   - [ ] No  
   - [ ] Don't know

18. **Child's tuition fees are**  
   - [ ] Subsidized (tuition assistance)  
   - [ ] Not subsidized (full fee)  
   - [ ] Don't know
### Child Information

1. **Student ID (Issued by district)**
2. **Statewide Student Identifier (10-digit SSID)**
3. **Gender**
   - ☐ Male
   - ☐ Female
   - ☐ Non-binary
4. **Birth date**
   - (e.g., 02/05/2017) __________ / _______ / __________
5. **Special education enrollment.**
   - ☐ Individualized Family Service Plan (IFSP)
   - ☐ Individualized Education Program (IEP)

### Child’s Language

6. **Is a language other than English spoken in the child’s home?**
   - ☐ Yes
   - ☐ No

### Special Education Information

7. **Special education eligibility.**
   - ☐ Autism
   - ☐ Deaf-Blindness
   - ☐ Deafness
   - ☐ Emotional Disturbance
   - ☐ Established Medical Disability
   - ☐ Hard of Hearing
   - ☐ Intellectual Disability
   - ☐ Multiple Disability
   - ☐ Orthopedic Impairment
   - ☐ Other Health Impairment
   - ☐ Specific Learning Disability
   - ☐ Speech or Language Impairment
   - ☐ Traumatic Brain Injury
   - ☐ Visual Impairment

8. **Adaptations used in the assessment.**
   - ☐ Augmentative or alternative communication system
   - ☐ Functional positioning
   - ☐ Alternative mode for written language
   - ☐ Sensory support
   - ☐ Visual support
   - ☐ Alternative response mode
   - ☐ Assistive equipment or device
   - ☐ None

### Child’s Educational Setting

9. **Where does the child receive early care and education services, including special education services?**
   - ☐ State Infant/Toddler Program
   - ☐ State Preschool
   - ☐ First 5
   - ☐ Early Head Start/Head Start
   - ☐ Tribal Head Start
   - ☐ Migrant Program
   - ☐ Child Care Center
   - ☐ Home-based
   - ☐ Remote Service Delivery/Distance Learning
   - ☐ Title 1
   - ☐ Family Child Care Home
   - ☐ Private Infant/Toddler or Preschool Program
   - ☐ District Infant/Toddler or Preschool Program
   - ☐ Separate Class/Special Day Class
   - ☐ Separate School for Children with Disabilities
   - ☐ Service Provider Location (e.g. clinic or office)
   - ☐ Other

### Program Information

10. **SELPA**
11. **District**

### Assessor Information

12. **Name of primary special education assessor**
13. **Role.**
   - ☐ Early Intervention Specialist
   - ☐ Occupational/Physical Therapist
   - ☐ Program Specialist or Administrator
   - ☐ Special Education Teacher
   - ☐ Speech/Language Pathologist
   - ☐ Teacher of the Deaf/Hard of Hearing
   - ☐ Teacher of the Visually Impaired
   - ☐ Other

14. **Did you collaborate with someone to complete the assessment?**
   - ☐ Yes
   - ☐ No

Use this Information Page for a child with an Individualized Family Service Plan (IFSP) or Individualized Education Program (IEP) served by a California Department of Education program.

<td>19</td>
<td>Collaboration to complete the assessment</td>
<td>If others worked with you to complete the DRDP (2015), check “Yes” and then check the box(es) that identify their role(s).</td>
</tr>
</tbody>
</table>
Quick Guide to Rating the Measures

1. **Review your documentation/evidence.**
   Review your own observation notes, observations from others (including teachers, family members/caregivers, and other service providers or caregivers, obtained through interview or conversations), and other documentation, including samples of children's work, photographs, and video/audio recordings of children's communication and behavior.

2. **Carefully read the definition and the descriptors, looking for mastery.**
   Read the descriptors before you read the examples. As you read the descriptors, try to narrow down which one is most consistent with your observations and other documentation of the child's typical behavior. A developmental level is mastered if the child demonstrates the knowledge, behaviors, and skills defined at that level:
   - Consistently over time
   - In different situations or settings

3. **After you read the descriptors, consider the examples.**
   The examples represent only some of the possible ways a child might demonstrate mastery. They are not a checklist of what the child must demonstrate. It is possible that a child does not demonstrate any of the specific examples provided, but does demonstrate mastery in other ways that are consistent with the intent of the descriptor.

4. **Based on your careful reading of the descriptors and examples and a review of your documentation, determine the child's level of mastery.**
   Once you've determined the latest developmental level the child has mastered, mark it appropriately.

5. **Indicate if the child is emerging to the next level (when the option to mark emerging is available).**
   If your observations indicate that the child has demonstrated mastery for a developmental level and is also beginning to demonstrate knowledge, skills, or behaviors described for the next level (although not yet consistently across situations or settings), the child may be emerging to the next level.

---

**Important Note:** When reading the descriptors, be sure you understand and pay attention to semicolons and the words “or” and “and.” Most descriptors define a single skill or behavior, but some include more than one. If the descriptor includes:

- The word “or,” the child only needs to demonstrate the behavior in one of the ways listed for the developmental level to be considered mastered.
- The word “and,” all parts of the descriptor are required for mastery and need to be observed together.
- A semi-colon (:) followed by the word “and,” the child must demonstrate all the behaviors listed to master the level, but not necessarily during the same observation.

**Remember, the examples illustrate only some of the many ways a child may demonstrate mastery.**
The Rating Record is to be used with the DRDP (2015) Instrument to keep track of each child's developmental levels as you complete the assessment. Mark the developmental level the child has mastered for every measure.

### ATL-REG 1: Attention Maintenance

Child develops the capacity to pay attention to people, things, or the environment when interacting with others or exploring play materials.

#### Mark the latest developmental level the child has mastered:

<table>
<thead>
<tr>
<th>Responding</th>
<th>Exploring</th>
<th>Building</th>
<th>Integrating</th>
</tr>
</thead>
<tbody>
<tr>
<td>Earlier</td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>Later</td>
<td></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

**Possible Examples**

- **Attends or responds briefly to people, things, or sounds**
  - Pays attention to a moving mobile.
  - Quiets to the voice of a familiar person.
  - Gazes at the smiling face of a familiar person.

- **Shifts attention frequently from one person or thing to another**
  - Turns attention toward an interesting toy, then back to an adult or a child.
  - Actively shifts interest from one child to another playing close by.
  - Drops one thing in order to reach for another.

- **Maintains attention, on own or with adult support, during brief activities**
  - Briefly watches other children playing and then resumes play with a toy.
  - Resumes playing at sand table when an adult joins in digging.
  - Dumps toy animals from container, puts animals back in the container, and then dumps them out again.

- **Maintains attention, with adult support, during activities that last for extended periods of time**
  - Listens to a book from beginning to end and then gestures for an adult to read it a second time.
  - Starts working on a simple puzzle with an adult and continues when the adult steps away briefly.
  - Continues playing with toy cars, adding a bridge offered by an adult sitting nearby.

- **Maintains attention on own during activities that last for extended periods of time**
  - Makes a pile of pretend pancakes with play dough on own and then offers them to peers.
  - Builds multiple towers with interlocking blocks.
  - Looks through several books on own in library corner during the morning.
  - Listens to audio books while looking at enlarged pictures related to the story on a screen, on own, during the morning.

**Conditional Measure**

- Measure not rated: the child’s development is beyond the latest developmental level.

(Required for children with IEPs)
## Developmental Domain: ATL-REG — Approaches to Learning—Self-Regulation

### ATL-REG 2: Self-Comforting

Child develops the capacity to comfort or soothe self in response to distress from internal or external stimulation

<table>
<thead>
<tr>
<th>Responding</th>
<th>Exploring</th>
<th>Building</th>
<th>Integrating</th>
</tr>
</thead>
<tbody>
<tr>
<td>Earlier</td>
<td></td>
<td>Middle</td>
<td></td>
</tr>
<tr>
<td>Later</td>
<td></td>
<td>Later</td>
<td></td>
</tr>
</tbody>
</table>

**Mark the latest developmental level the child has mastered:**

**Responding**
- Engages in behaviors that have previously worked to soothe self
  - Sucks thumb or fist to soothe self.
  - Turns away from sensory experiences such as loud noises, bright lights, or specific textures.
  - Nuzzles face into a blanket or a familiar adult’s shoulder when unfamiliar adults approach.

**Responds to internal or external stimulation in basic ways**
- Cries when hears a loud noise.
- Closes eyes when taken into bright sunlight.
- Brings fist to mouth and fusses when hungry.

**Exploring**
- Comforts self by seeking a familiar adult or a special thing
  - Retrieves a familiar object, such as a blanket, to soothe self when upset.
  - Gestures “up” to a familiar adult to be picked up when sleepy.
  - Seeks contact with a familiar adult when a toy is taken by another child.

**Commits self to comfort in different ways, based on the situation**
- Softly hums or vocalizes to self when lying down for naptime.
- Goes to cubby and gets a photo of family when upset after a parent leaves.
- Seeks out a cozy place to get away from active play of other children.
- Remains seated in a small group activity while manipulating a favorite toy.

**Anticipates need for comfort and prepares self by asking questions, getting a special thing, or in other ways**
- Asks what’s going to happen next, to get ready to transition to a new activity.
- Requests favorite book to read with parent before the parent leaves.
- Moves away and covers ears when an adult brings out a vacuum to clean spilled sand on the floor.

---

- Child is emerging to the next developmental level
- Unable to rate this measure due to extended absence

Conditional Measure
- Measure not rated: the child’s development is beyond the latest developmental level.

(Required for children with IEPs)
**Developmental Domain: ATL-REG — Approaches to Learning—Self-Regulation**

**ATL-REG 3: Imitation**

Child mirrors, repeats, and practices the actions or words of others in increasingly complex ways

| Mark the latest developmental level the child has mastered: |
| --- | --- | --- | --- | --- |
| **Responding** | **Exploring** | **Building** | **Integrating** |
| Earlier | Later | Earlier | Later | Earlier | Middle | Later | Earlier |

- **Responds to facial expressions or vocalizations in basic ways**
  - Pay attention to vocalizations from an adult, such as cooing, heard during an interaction.
  - Attends to an adult’s face during an interaction.
  - Orients toward the gestures of a familiar adult.

- **Imitates approximations of single simple actions or sounds when interacting with others**
  - Makes a sound like “Mmmmm” after an adult makes the “Mmmmm” sound during feeding.
  - Smiles when an adult smiles.
  - Widens eyes and raises eyebrows after observing these movements on an adult’s face during an interaction.

- **Imitates actions, or Repeats familiar words or gestures by others when interacting with them**
  - Opens and shuts hands as an adult leads open-shut-them finger play.
  - Raises arms in the air, following an adult’s actions, during a game of “So big!”

- **Imitates a few actions, or Repeats familiar actions or words experienced at an earlier time**
  - Holds a toy telephone to ear and says, “Hello.”
  - Places doll in front of a toy shopping cart and wheels it around the room, placing objects in the cart.
  - Engages in exercise movements that adults typically do.
  - Wraps a teddy bear in a blanket and communicates, “Night-night.”

- **Imitates multiple steps of others’ actions, or Repeats phrases, experienced at an earlier time**
  - Communicates, “Be safe,” (using adult intonation) when friends begin to move too fast through the classroom.
  - Pretends to cook a meal by taking out play food and pots, turning on a toy stove, and stirring the pots with a spoon.
  - Dresses up with fancy shoes and clothes in dress-up area, and communicates, “It’s time to party.”

- **There are no later levels for this measure**

---

- ○ Child is emerging to the next developmental level
- ○ Unable to rate this measure due to extended absence

**Conditional Measure**

- ○ Measure not rated: the child’s development is beyond the latest developmental level.

(Required for children with IEPs)
## Developmental Domain: ATL-REG — Approaches to Learning–Self-Regulation

### ATL-REG 4: Curiosity and Initiative in Learning

Child explores the environment in increasingly focused ways to learn about people, things, materials, and events.

### Mark the latest developmental level the child has mastered:

<td>Calms when comforted by an adult</td>
<td>Seeks a familiar adult when distressed, and responds when physically comforted by a familiar adult</td>
<td>Calms self when a familiar adult initiates contact, moves close, or offers a special thing</td>
<td>Relies on communication or guidance from a familiar adult to regulate emotional or behavioral reactions in moderately stressful situations</td>
<td>Demonstrates capacity to regulate emotional or behavioral reactions in some moderately stressful situations, occasionally needing adult support</td>
</tr>
</tbody>
</table>

**Possible Examples**

- **Earlier**
  - Lessens or stops crying when picked up by an adult.
  - Relaxes in an adult’s arms when being held.
  - Quiets to the voice of a familiar adult.

- **Later**
  - Reaches toward a familiar adult to be comforted and nestles into the adult when held.
  - Vocalizes to a familiar adult and calms when the adult reaches over to pat child’s stomach.
  - Looks toward a familiar adult when startled, and relaxes when picked up.

- **Possible Examples**
  - Gets up and looks for an adult after falling down, and then resumes play when the adult gives a reassuring look.
  - Stops crying after an adult offers a toy similar to the toy another child took.
  - Calms when an adult moves to sit closer on the floor.
  - Lets go of another child’s toy and accepts a different toy after a familiar adult communicates, “She’s playing with the blue truck. You can use the red one.”
  - Gets a towel when an adult suggests that they work together to clean up a spill that the child is upset about.
  - Accepts an adult’s invitation to move closer, after noticing child’s worried look when an unfamiliar adult enters the room.
  - Waits to ride a favorite tricycle without trying to take it from another child.
  - Pauses and sighs after tower falls down, and then starts to rebuild it when an adult asks, “Do you want to make it again?”
  - Frowns, but goes to play with something else, when an adult communicates that it is not yet time to go outside.
  - Insists that another child return a favorite doll, but when refused, asks a familiar adult for help.
  - Communicates feelings of anger, through words or gestures, to a familiar adult when another child takes a toy without asking.
  - Communicates, “Tôi muốn ngủ giấc dài,” (“I want to sit here,” in Vietnamese), when upset that there are no empty chairs near a friend.
  - Offers a toy in exchange when another child has a desired toy.
  - Asks another child when is painting at an easel, “When is it my turn? I’ve been waiting.”
  - Leaves the block area after unsuccessfully attempting to join peers, and then moves to the dramatic play area to join other children in play.
  - Communicates, “I want a turn. Can I use the scooter after you go around two times?” after watching another child ride for a while.
  - Communicates, “Don’t push!” to another child trying to fit at the water table, and then says, “Here’s a place,” and moves over.
  - Communicates to self, in words or signs, that the monsters are just pretend, when attending to a scary story.
  - Uses a communication device to suggest a strategy to share the limited number of popular art materials during a collage project.
**Developmental Domain: ATL-REG — Approaches to Learning–Self-Regulation**

**ATL-REG 6: Engagement and Persistence**
Child increasingly persists in understanding or mastering activities, even if they are challenging or difficult

<td>Continues to work on spinning a round hoop around own waist over successive days.</td>
</tr>
<tr>
<td>Later</td>
<td></td>
<td>Selects activities, but switches quickly from one to another, even with adult support to help focus on one activity</td>
<td>Continues self-selected activities on own while engaged in self-selected activities</td>
<td>Continues at a pottery activity that involves shaping clay, letting it dry, painting it, and letting it dry some more.</td>
</tr>
<tr>
<td></td>
<td></td>
<td></td>
<td></td>
<td>Writes own name, then writes it more clearly a second time at classroom sign-in table.</td>
</tr>
</tbody>
</table>

**Possible Examples**
- Puts a ring on and off of a ring stack a few times.
- Fills and dumps sand from a bucket.
- Shakes a bell while others are singing.
- Uses hands to smear finger paint.
- Activates a switch toy.

- Chooses to play in the dramatic play area for a short while and then plays in the block area.
- Selects a puzzle to work on with an adult, works on it together for a short time, and then wanders off, even with the adult’s encouragement to continue.
- Joins a small group and attends briefly to an adult reading a book, and then shifts attention to another activity.
- Strings large beads with an adult to make a necklace, briefly watches another child who brings magnets to the table, and then continues stringing beads.
- Stops playing with blocks and starts to move away from block area, but returns when an adult offers props, such as cars and street signs, to use with the blocks.
- Pauses to watch children running by while scooping sand, but returns to scooping when the adult offers another sand toy.
- Continues working on a difficult puzzle, asking an adult for help when needed.
- Continues looking at a book as an adult encourages other children entering the same area to find a book.
- Asks adult for headphones, while listening to a story on tape, when other children begin to play noisily nearby.
- Starts to get ready to go outside with other children, and asks for adult assistance with fasteners when putting on shoes.
- Continues to build a structure with interlocking blocks even when having difficulty finding the “right” pieces.
- Glues a variety of materials together to create a three-dimensional collage, trying different ways to make them stick.
- Repeatedly tries to trace around own hand.
- Completes an obstacle course using a walker, even on bumpy ground.
- Continues to work on building a structure with interlocking blocks even when having difficulty finding the “right” pieces.

Child is not yet at the earliest developmental level on this measure
- Child is emerging to the next developmental level
- Unable to rate this measure due to extended absence
## Developmental Domain: ATL-REG — Approaches to Learning—Self-Regulation

### ATL-REG 7: Shared Use of Space and Materials

Child develops the capacity to share the use of space and materials with others

Mark the latest developmental level the child has mastered:

<table>
<thead>
<tr>
<th></th>
<th>Responding</th>
<th>Exploring</th>
<th>Building</th>
<th>Integrating</th>
</tr>

</tbody>
</table>

### Possible Examples

- **Responding**
  - There are no earlier levels for this measure

- **Exploring**
  - Demonstrates preferences for a few specific toys or materials
  - Takes and plays with materials of interest, even when they are being used by another child
  - Shows awareness that other children might want to use materials, by taking action to control the materials
  - Maintains control of some preferred materials, allowing others to use the rest, but will need adult support to share preferred materials with other children
  - Follows expectations or procedures for sharing, most of the time, without adult prompting

- **Building**
  - Offers to share space or materials with others in the absence of explicit expectations for sharing

- **Integrating**
  - Communicates to another child, “That’s mine [referring to a carpet square]. Go get one from the pile over there,” while getting ready for story time.
  - Communicates, “It’s my turn when you are done,” to a child who is using the tricycle.
  - Puts name on waiting list when wanting to have a turn at the computer, after reminder by an adult that there is a waiting list.

- **Child is not yet at the earliest developmental level on this measure**
- **Child is emerging to the next developmental level**
- **Unable to rate this measure due to extended absence**
### Developmental Domain: SED — Social and Emotional Development

#### SED 1: Identity of Self in Relation to Others

Child shows increasing awareness of self as distinct from and also related to others

<table>
<thead>
<tr>
<th>Mark the latest developmental level the child has mastered:</th>

</tr>
<tr>
<td>Responds in basic ways to others</td>
<td>Uses senses to explore self and others</td>
</tr>
</tbody>
</table>

**Possible Examples**

- **Responding**
  - Attends to a familiar adult during feeding.
  - Quiets when hears a familiar adult.
  - Grasps an adult’s finger when palm of child’s hand is touched.

- **Exploring**
  - Examines own hand or foot by looking at it or mouthing it.
  - Touches others’ hair when it is within reach.
  - Plays with sound by repeating grunts and squeals.

- **Building**
  - Orient toward a familiar adult when own name is spoken or signed.
  - Points to picture of self on the wall.
  - Smiles when a familiar adult enters the room.
  - Communicates, “Me llamo Luis,” [“My name is Luis,” in Spanish].
  - Communicates names of immediate family members in a photo.
  - Looks to new baby sister and communicates her name.
  - Acts out roles from own family in pretend play.
  - Communicates, “I’m making cookies—just like Grandma!” while rolling play dough.
  - Narrates details while drawing a picture of a friend.
  - Draws picture of a house and communicates, “This is my house.”
  - Communicates, using communication board, “His hair is red!”
  - Identifies own height, as indicated on a growth chart posted on the wall.
  - Draws picture of own family, representing traits such as heights and hair colors.
  - Communicates to an adult, “I was mad when it rained because we couldn’t go outside.”
  - Communicates that a friend is happy because he is going to have a birthday party.
  - Says, “Ayokong hawakan ang susô. Na tatakot ako,” [“I don’t want to touch the snail. It scares me,” in Tagalog].
  - Communicates, “我喜欢游泳, 但是我姐姐不喜欢,” [“I love to swim, but my sister doesn’t,” in Chinese].

- **Integrating**
  - Selects a pink scarf for a friend whose favorite color is pink, then selects a blue scarf for self.
  - Communicates to a peer that they both like peanut butter and jelly sandwiches.
  - Communicates, “我想游泳, 但是我姐姐不喜欢,” [“I want to swim, but my sister doesn’t,” in Chinese].

- **Heart icon**

**Child is emerging to the next developmental level**

**Unable to rate this measure due to extended absence**

<td></td>
<td>Participates in brief episodes of cooperative play with one or two peers, especially those with whom child regularly plays</td>
<td>Organizes or participates in planning cooperative play activities with several peers, particularly with friends</td>
</tr>
</tbody>
</table>

#### Possible Examples

- **Responding**
  - Moves excitedly when another child comes near.
  - Reaches toward another child to gain attention.
  - Notices another child nearby.
  - Cries when hearing the sound of another child crying.
  - Orient toward other children.
  - Smiles at another child.
  - Selects a truck when other children nearby are playing with trucks.
  - Explores a toy alongside another child who is also exploring.
  - Reaches for a toy in the water alongside other children at the water table.

- **Exploring**
  - Hands a bucket to a familiar peer sitting next to child in the sandbox.
  - Offers a block to a peer building a tower next to child.
  - Splashes excitedly with a peer at the water table, continuing back and forth.
  - Takes a few turns trying on hats with a peer in the dramatic play area.
  - Builds a train track with two friends, taking turns connecting the track pieces.

- **Building**
  - Plays chase briefly outside with two peers, and then goes to play alone in sandbox.
  - Plays cars with a peer for a short while.
  - Plays a game of telephone that involves having a conversation with a friend about going on a shopping trip together.
  - Plays restaurant with friends, showing them the signs for food to be ordered.

- **Integrating**
  - Plays superheroes with peers, planning different characters and scenarios.
  - Joins peers in planning and gathering materials needed for a nature walk, such as nets, baskets, and bags.
  - Plans how to build a boat with several peers, choosing materials and negotiating tasks.
  - Plays superheroes with peers, planning different characters and scenarios.
  - Joins peers in planning and gathering materials needed for a nature walk, such as nets, baskets, and bags.
  - Invites friends to build a pretend barn for toy animals and, at clean-up time, asks to save it so they can play with it tomorrow.
  - Invites friends to continue playing family from the day before.
  - Offers a new object for a fort that child has built with peers over several days.
  - Plays restaurant with friends, showing them the signs for food to be ordered.

- **Middle**
  - Invites friends to continue playing family from the day before.
  - Offers a new object for a fort that child has built with peers over several days.

- **Later**
  - Organizes or participates in planning cooperative play activities with several peers, particularly with friends.

- **Earlier**
  - Build a pretend barn for toy animals and, at clean-up time, asks to save it so they can play with it tomorrow.

- **Middle**
  - Invites friends to continue playing family from the day before.

- **Later**
  - Offers a new object for a fort that child has built with peers over several days.

- **Earlier**
  - Plays restaurant with friends, showing them the signs for food to be ordered.

- **Possible Examples**

  - **Responding**
    - Responds to voices, sounds, gestures, or facial expressions in a basic way
    - Recognizes a few frequently used words or gestures in familiar situations
    - Shows understanding of a variety of single words
    - Shows understanding of frequently used simple phrases or sentences
    - Shows understanding of a wide variety of phrases or sentences
    - Shows understanding of some complex vocabulary, phrases, or sentences as used in conversations, stories, or learning activities
    - Shows understanding of language that refers to abstract concepts, including imaginary events
    - Shows understanding of a series of complex statements that explain how or why things happen

  - **Possible Examples**
    - Turns head toward, or looks in the direction of, the voice of an adult.
    - Makes eye contact with a familiar adult.
    - Quiets or orients in the direction of a sound, touch, or gesture.
    - Smiles or gurgles in response to a familiar adult's voice or simple gestures.
    - Makes a sound similar to “Mmmmm” during a social interaction with a familiar adult.
    - Avoids eyes to disengage from a social interaction with an adult.
    - Bounces or waves arms to indicate interest in continuing an activity after an adult pauses and asks, “More?”
    - Orient toward a familiar person or thing when it is named.
    - Indicates a bell in a storybook when adult asks about a bell.
    - Looks to the wagon after an adult refers to the wagon.
    - Points to pictures of a bird, a tree, and a house, as an adult says the name of each, while looking at a book together.
    - Gets jacket after an adult communicates, “Get your jacket. It’s time to go outside.”
    - Moves to the sink after an adult communicates, “Time to wash hands.”
    - Passes the milk at lunch time after an adult communicates, “Please pass the milk.”
    - Offers to help after an adult communicates, “Would you like to help me feed the turtle?”
    - Collects different types of art supplies after an adult explains an art project and where to find the supplies.
    - Hands crayons from the shelf after an adult asks, “Can you hand me the crayons that are on the shelf?”
    - Adds blocks to a tower after a peer says, “Let’s make our skyscraper the tallest!”
    - Holds the door open, after an adult asks the child to do so, until all of the other children have come into the room.
    - Points to the picture of an eagle and its nest while sharing a book about animals building their homes.
    - Communicates, “I’m a princess and I live in a castle,” while playing dress-up.
    - Pretends to be a character in a story after a read-aloud of the story.
    - Draws a picture about the changing seasons, after an adult talks about why the weather has changed.
    - Selects materials that float, while making a boat, after hearing an adult talk about materials that float or sink.

- **Child is emerging to the next developmental level**
- **Unable to rate this measure due to extended absence**

---

**LLD 2: Responsiveness to Language**

Child communicates or acts in response to language and responds to increasingly complex language

Mark the latest developmental level the child has mastered:

**Possible Examples**

- Turns head or looks in direction of voices.
- Sustains gaze at an adult’s smiling face.
- Quiets or orients in the direction of a sound or gesture.
- Cries when child hears another child cry.

- Smiles in response to a familiar adult’s voice or gestures.
- Vocalizes in response to a familiar adult’s voice.
- Moves toward a familiar adult’s extended arms.
- Turns head and looks away after a familiar adult offers a bottle or food again.

- Reaches for a familiar object after it is named.
- Looks up at sky after an adult communicates, “There’s an airplane.”
- Moves toward the sandbox after an adult says, “I see new toys in the sandbox.”
- Communicates, “Okay,” after an adult says, “Your friend wants to play, too.”
- Calms when adult communicates, “Your turn is next.”
- Picks up sand toys after an adult says, “Please pick up the sand toys.”
- Brings a watering can to the garden after a peer asks, “Want to water?”
- Brings shoes after an adult requests, “Bring me your shoes. I’ll help you put them on.”
- Uses a communication board to make a choice when an adult says, “Tell me what you would like to do next.”
- Communicates, “Yo,” [“Me,” in Spanish], after an adult asks, “Who is the helper for snack?”
- Puts compostable cup into compost bin recently added to the room after adult communicates, “Please put your cup in the compost bin.”
- Brings a toy to the library counter after an adult asks, “Find a book and take it to the library counter.”
- Follows the steps communicated by an adult at the end of an art activity to remove smock, hang it up, and then wash hands.
- Follows adult’s request to “push your chair in, put your book in the cubby, and wash your hands.”
- Chooses a book and then carries it to the library counter after an adult says, “Find a book and take it to the library counter.”
- Gathers different materials from outside, brings them inside, and places them on a table, as suggested by an adult, to create a nature display.
- Cares for a new pet for the first time by providing clean water, food, and fresh shavings for a guinea pig, after being told the steps by a peer.

- Child is emerging to the next developmental level
- Unable to rate this measure due to extended absence
### LLD 3: Communication and Use of Language (Expressive)

Child’s communication develops from nonverbal communication to using language with increasingly complex words and sentences.

[Circle symbol] Child is emerging to the next developmental level

[Circle symbol] Unable to rate this measure due to extended absence
### Developmental Domain: LLD — Language and Literacy Development

#### LLD 6: Comprehension of Age-Appropriate Text

Child develops capacity to understand details and ideas from age-appropriate text presented by adults

| Mark the latest developmental level the child has mastered: |
|---|---|---|---|---|---|
| **Responding** | **Exploring** | **Building** | **Integrating** |
| Earlier | Later | Earlier | Middle | Later | Earlier | Middle | Later | Earlier |
| There are no earlier levels for this measure | Shows interest when attending to books, pictures, or print materials, with an adult | Makes comments about text presented in books or the environment | Demonstrates understanding of both narrative and informational text by summarizing, comparing, or making inferences about people, objects, or events |

**Possible Examples**

- **Earlier**
  - Looks at a picture book with an adult.
  - Brings a favorite book about baby animals to an adult, to be reread often.
  - Points to photos, with captions, that were taken while on a nature walk.
  - Turns the page after an adult stops reading a book.
  - Touches Braille and image of sheep with textured wool in a book and says, “Sheep.”

- **Middle**
  - Communicates, “Pastá,” after an adult points out items on a children’s menu.
  - Communicates, “Elephants have really big ears,” after an adult reads about elephants.
  - Takes a shawl to carry a doll after a read-aloud of the storybook "What Can You Do with a Rebozo?" ["Shawl" in Spanish].
  - Communicates that the caterpillar will have a stomachache, after rereading *The Very Hungry Caterpillar.*

- **Later**
  - Communicates, “Pasta,” after an adult asks, “What do you see?” while reading a book about farm animals together.
  - Communicates, “What will happen next?” while an adult reads a book about firefighters to ask, “What will happen next?”
  - Communicates, “Firefighters have to put out fires,” after an adult pauses while reading a book about firefighters to ask, “What did they do?”
  - Communicates, “Firefighters have to wear safety clothes, so that they don’t get burned,” after an adult reads a book about what firefighters do.
  - Communicates, using a communication board, “Firefighters have to wear special clothes so that they don’t get burned,” after an adult reads a book about what firefighters do.

**Notes:**
- ○ Child is not yet at the earliest developmental level on this measure
- ○ Child is emerging to the next developmental level
- ○ Unable to rate this measure due to extended absence
**Developmental Domain:** LLD — Language and Literacy Development

**LLD 7: Concepts About Print**
Child shows an increasing understanding of the conventions and physical organization of print material and that print carries meaning*

---

## Mark the latest developmental level the child has mastered:

<table>
<thead>
<tr>
<th>Responding</th>
<th>Exploring</th>
<th>Building</th>
<th>Integrating</th>

<tr>
<td>Explores books</td>
<td>Engages with print materials while being read to by an adult</td>
<td>Demonstrates understanding of the way books are handled</td>
<td>Demonstrates understanding of how to follow print on a page of text</td>
</tr>
</tbody>
</table>

### Possible Examples

- **Responding**
  - Opens and closes a book.
  - Touches the pages of a book when looking at a book on own.
  - Holds or carries a book.
  - Brings book to adult.

- **Exploring**
  - Points to pictures in a book while an adult reads the book aloud.
  - Lifts tabs in an interactive book while being read to by an adult.
  - Picks up a book, opens it up, and then turns it right side up.
  - “Reads” to self, attempting to turn pages from front to back.
  - Turns pages of an adapted book, using ice pop stick handles.

- **Building**
  - Points at a stop sign and then communicates, “That means stop,” while on a neighborhood walk.
  - Points to the print while pretending to read a page with both print and pictures.
  - Requests that an adult write words next to a picture the child has drawn.
  - Moves fingers along print, from one end of the page to another.
  - Points to the first word on a page and then communicates, “Bộ đáy,” (“Start here,” in Vietnamese).
  - Points to the words on the front cover of the book or title page and communicates that it is the name of the book.
  - Communicates that the first letter or sound of a peer’s name is the same as the first letter or sound of child’s own name.

- **Integrating**
  - Communicates, “There are two words on this sign,” while looking at a sign with the words “Writing Center.”
  - Creates a pretend grocery list with letters that look like words, then names the words as grocery items, such as “corn,” “milk,” and “bread.”
  - Communicates that the first letter or sound of a peer’s name is the same as the first letter or sound of child’s own name.

---

* Children who are familiar with print in languages other than English may demonstrate differences in how they approach print materials. Some languages (e.g., English, Spanish, Tagalog, Vietnamese) are written from left to right within a horizontal line of print and from top to bottom in books and other print media. Other languages (e.g., Arabic, Hebrew) are written from right to left within a horizontal line of print and from top to bottom in books and other print media.

---

**Concepts About Print**

- **Child is not yet at the earliest developmental level on this measure**
- **Child is emerging to the next developmental level**
- **Unable to rate this measure due to extended absence**
**LLD 8: Phonological Awareness**

Child shows increasing awareness of the sounds (elements) that make up language, including the ability to manipulate them in language

---

### Mark the latest developmental level the child has mastered:

<table>
<thead>
<tr>
<th>Responding</th>

</tbody>
</table>

**Possible Examples**

- **There are no earlier levels for this measure**
- **Attends to sounds or elements of language**
- **Demonstrates awareness of variations in sounds**
- **Engages actively in play with sounds in words or rhymes, or Sings simple songs, or Repeats simple nursery rhymes**
- **Demonstrates awareness of larger units of language (e.g., words, syllables)**
- **Blends larger units of language (e.g., compound words and syllables) with or without the support of pictures or objects; and Segments larger units of language (e.g., compound words and syllables) with or without the support of pictures or objects**
- **Blends smaller units of language (e.g., onsets and rimes), with or without the support of pictures or objects; and Segments smaller units of language (e.g., onsets and rimes), with or without the support of pictures or objects**

---

- Turns toward adult when adult sings a song.
- Looks at adult’s hands when adult signs “more.”
- Attends to adult saying, “bye-bye.”
- Whispers a word, and then says it loudly.
- Communicates, “No, no, no, no,” varying pitch.
- Uses sounds or hand movements to play with variations of stress and rhythm.
- Rhymes children’s names with other words during a group sing-along.
- Sings “Twinkle, Twinkle, Little Star” with a group.
- Communicates the rhyming word “fall,” after an adult says, “Humpty Dumpty sat on a wall. Humpty Dumpty had a great . . . ?”
- Uses signs to participate in a song such as “The Wheels on the Bus.”
- **Drums out each word in “I am Matt” in a name game in the classroom, after an adult has modeled drumming while saying single words.**
- **Claps the syllables in familiar words, such as children’s names or days of the week, with adult and peers.**
- **Moves arms each time the word “row” is said in the song “Row, Row, Row Your Boat,” with adult and peers.**
- **Answers, “Goldfish,” after an adult asks, “If you put together the words ‘gold’ and ‘fish,’ what word does that make?”**
- **Communicates, “Rain,” after an adult communicates, “There are two words in ‘raincoat.’ What happens when we take away the word ‘coat’?” while moving a picture of a coat away from a picture of rain.**
- **Communicates, “Zebra,” after an adult separates the word into syllables, and says, “Ze- . . . , and ‘-bro,’” while looking at a wordless picture book about the zoo.**
- **Communicates, “Marker,” after an adult communicates, “What happens when I put the two syllables ‘mark’- and ‘-er’ together?”**
- Communicates, “Cup,” at the snack table, after an adult says, “I have a c-up. What do I have?”
- Communicates, “Lee,” after an adult asks what word is left when the m- is removed from the word “mice,” while playing a word game.
- Communicates, “d” (letter sound), while looking at a picture of a dog, after an adult says, “What is the first sound you hear when you say ‘dog’?” while looking at pictures of dogs together.

---

* Children who are deaf and learning American Sign Language will attend to elements of language (hand shapes and movements) in the early levels of learning, but eventually will be able to use finger spelling in relation to learning about sounds. For a child who is hard of hearing, has a cochlear implant, or is using cued speech, the sequence may or may not be similar to that of a hearing child.

<tbody>
<tr>
<td><strong>Responding</strong></td>
</tr>
<tr>
<td>Earlier</td>
</tr>
<tr>
<td>Makes scribble marks</td>
</tr>
<tr>
<td>There are no earlier levels for this measure</td>
</tr>
</tbody>
</table>

#### Possible Examples

- **Responding**
  - Dips sponge in paint and dots onto paper.
  - Makes a dot on a paper and then makes more dots using different markers.
  - Holds crayon against paper.

- **Exploring**
  - Makes marks on paper
  - Makes scribble marks
  - Uses crayons, pencils, or markers to make back-and-forth marks.
  - Paints using large or small movements.
  - Scribbles by moving finger on screen of tablet or by using Braille writer.

- **Building**
  - Draws circles and lines and comments, “Baby,” and “Mommy.”
  - Makes marks on paper and then explains that it is a birthday cake.
  - Draws a series of lines to represent a house and a tree.
  - Makes marks to represent the dog from a story by moving finger on screen of tablet or touch screen of computer.

- **Integrating**
  - Makes marks that are linear and spaced like letters or words while writing a pretend grocery list.
  - Makes marks for a restaurant order in the dramatic play area.
  - Uses an adaptive device to hold a marker to make marks on paper to represent the word “mom.”
  - Writes own name on drawings made in class.
  - Signs a self-made card to grandma with a close approximation of own name.
  - Uses a few letter stamps to represent own name.

- **Possible Examples**
  - Uses a few letter stamps to represent own name.
  - Uses an adaptive device to hold a marker to make marks on paper to represent the word “mom.”
  - Writes several words or a few simple phrases, or clearly recognizable approximations.

* Children who are familiar with print in languages other than English may demonstrate differences in how they approach writing. For instance, some languages use letters (e.g., English, Spanish, Tagalog, Arabic, Hebrew), while others use characters (e.g., Chinese).

<td>Recognizes a few frequently used words or gestures in the home language and culture in familiar situations</td>
<td>Shows understanding of words and phrases in conversations, stories, and interactions in home language (may show little understanding of common words and phrases in English)</td>
<td>Attends to interactions in English and sometimes participates in activities conducted in English; and Shows understanding of a few common English words in familiar contexts or routines</td>
<td>Shows understanding of some common words and phrases in English during interactions and activities conducted in English, occasionally with support of home language, nonverbal cues, or both</td>
<td>Shows understanding of many words, phrases, and concepts in English during interactions and activities conducted in English, occasionally with support of home language, nonverbal cues, or both</td>
<td>Shows understanding of most information and concepts communicated in English for both instructional and social purposes</td>
</tr>
</tbody>
</table>

#### Possible Examples

- Waves good-bye after an adult communicates, “Good-bye,” in the child’s home language and culture.
- Indicates interest in continuing an activity after an adult pauses and asks to continue in the child’s home language and culture.
- Orients toward a familiar person or thing when it is named in the home language.

- Adds a block to the top of a tower in response to a question in the child’s home language, “Can you make it taller?”
- Passes a book to another child when requested in the child’s home language, having not responded to the same request in English.
- Seeks out and plays with peers who speak the child’s home language, while in the dramatic play area.
- Pauses to listen to peers speaking English for a short period of time while playing in the sandbox.
- Nods head when an adult at the snack table asks in English, “Do you want more apples?” while holding up a plate of apple slices.
- Begins to put blocks on a shelf when a peer says in English, “Clean-up time.”
- Points to the ball when a peer says in English, “Where is the ball?” during outdoor play time.
- Goes to get markers after an adult asks in English if child would like to use paint or markers to make a birthday card for a peer.
- Approaches the door to go inside when an adult says in English, “It is time to go in for a snack,” and adds, “¡Hora de comer!” [“Time to eat!” in Spanish].
- Adds more blocks to a road when a peer communicates in English, “We need a longer road.”
- Pretends to talk on the phone when a peer says in English, “Baby’s sick. Call the doctor.”
- Puts drawing on the counter after an adult asks in the child’s home language, “Please put your drawing on the counter. It’s wet and it needs to dry.”
- Sorts orange and green squash after an adult says in English, “Let’s separate them by color.”
- Brings a bigger block to a peer in response to a question in English by the peer, “Could you bring me the bigger block?”
- Nods head excitedly when a peer asks in English if child wants to ride bikes together outside.

---

☐ Child is emerging to the next developmental level

☐ Unable to rate this measure due to extended absence
**ELD 2: Self-Expression in English (Expressive English)**
Child shows increasing progress toward fluency in speaking English

### Mark the latest developmental level the child has mastered:

<td>Communicates in English, using single words and common phrases (may mix English with home language)</td>
<td>Communicates in English, using sentences that may be incomplete (may contain grammatical errors and may mix English with home language)</td>
<td>Communicates in English, often using complete sentences, about a variety of social and instructional concepts and topics (may contain grammatical errors and may mix English with home language)</td>
</tr>
</tbody>
</table>

**Possible Examples**

- **Asks for food when hungry, by using a special word, sound, or gesture for food.**
- **Communicates from child’s home language, “Mama,” “Dada,” or other word approximations.**
- **Reaches for or gestures for an object.**

**Discovering Language**

- Takes an adult’s arm and leads the adult to the drawing area, where several children are drawing, and reaches or gestures toward the paper container.
- Nods, “Yes,” and responds in home language in response to a routine question such as, “Do you want more milk?” while an adult holds up a pitcher of milk.
- Communicates, “¿Puedo pintar contigo?” (“Can I paint with you?” in Spanish) while approaching a peer who is painting.
- Communicates, “这是它们的家,” (“This is their home,” in Chinese) while putting some toy animals under a blanket in the dramatic play area.
- Communicates in English, “Bye,” to a peer when leaving at the end of the day.
- Greets peers in home language and joins in singing the words “good morning” in English during the daily morning song.
- Chimes in with, “The end!” in English when an adult finishes reading a story to a small group of children.
- Communicates in English, “Marker,” to ask for a marker from a peer while playing restaurant in the dramatic play area.
- Communicates in English, “I do a house,” ["I made a house," while painting.
- Communicates to a peer in English, “My turn,” and gestures at the slide during outdoor play.
- Communicates, “The dog 变成一个 lady 了,” ["The dog turned into a lady," in English and Chinese] while helping to put a dress on a stuffed dog in the dramatic play area.
- Communicates in English, “The lamb licked my hand!” ["The lamb licked my hand!""] when describing a family trip to a petting farm that occurred last weekend.
- Communicates to a peer, “My dad rides a 騎士,” ["My dad rides a" in English; "horse" in Vietnamese] while attempting to draw a horse.
- Communicates in English, “This is happy new year. This is mommy and me. We saw the dragon,” in response to an adult asking, “Tell me about your picture.”
- Communicates to a peer, “I ate huevos [“little eggs” in Spanish]. The huevos were really yummy! My papi [“daddy” in Spanish] and me, we get them at la tiendita [“the little store” in Spanish].”
- Communicates in English, “I’m going to cook them now,” while throwing some noodles made with play dough into a toy pot, and later puts “cooked noodles” on a plate and communicates, “Here’s a plate for you,” while handing it to a peer.

**Conditional Measure**

- Measure not rated: English is the only language spoken in this child’s home.

**Children**

- Child is emerging to the next developmental level
- Unable to rate this measure due to extended absence
**Mark the latest developmental level the child has mastered:**

<table>
<thead>
<tr>
<th>Developmental Domain: ELD — English-Language Development</th>
<th>Conditional Measure</th>
</tr>
</thead>
<tbody>
<tr>
<td>ELD 3: Understanding and Response to English Literacy Activities</td>
<td>Measure rated: English is the only language spoken in this child’s home.</td>
</tr>
</tbody>
</table>

Child shows an increasing understanding of and response to books, stories, songs, and poems presented in English.

### Possible Examples

**Discovering Language**
- Attends briefly to a familiar adult looking at books, singing songs, or saying rhymes in home language.
- Looks at pictures in a book for a short time while a familiar adult reads in the home language.
- Reaches to turn the page of a board book.
- Draws a picture and communicates, “Chicken eat it all. Lahat ito!”

**Discovering English**
- Participates in literacy activities in home language; and
- Attends to simple literacy activities in English with some support.
- Joins in with peers who are singing a song or chanting in child’s home language.
- Reaches to turn the page of a board book.

**Exploring English**
- Uses home language, gestures, or single words in English to show understanding of literacy activities in English.
- Uses frequently used words and short phrases in English to communicate understanding about a book, story, song, or poem told, read, or sung in English (often uses actions; may mix English with home language).
- Reppeats the first line of “Five Little Monkeys Jumping on the Bed,” with accompanying hand motions.
- Creates a picture and communicates, “This is spider. This is fly,” after listening to the book The Very Busy Spider.

**Developing English**
- Uses a variety of words and phrases in English to communicate understanding about key ideas of a book, story, song, or poem told, read, or sung in English (sometimes uses actions; may mix English with home language).
- Brings the book Rosie’s Walk to a peer and communicates, “Chicken eat it all. Lahat ito!”
- Communicates, “Baby bear mad! The girl, she eat it all. Lahat ito!”

**Building English**
- Uses elaborated English phrases with a variety of vocabulary and grammatical structures to communicate understanding of the content of a book, story, song, or poem (may mix English with home language).
- Communicates to a peer, “Sharks have sharp teeth to bite, and they swim fast,” while paging through a book about the ocean.
- Communicates, “My mommy kiss me before I come to school. She say, ‘I love you, hijito.’ Then she goes to work,” while reading The Kissing Hand with an adult.

**Integrating English**
- Uses frequently used words and phrases in English to communicate understanding of key ideas of a book, story, song, or poem told, read, or sung in English.
- Brings the book Rosie’s Walk to a peer and communicates, “Chicken eat it all. Lahat ito!”
- Communicates, “Baby bear mad! The girl, she eat it all. Lahat ito!”

**Conditional Measure**
- Child is emerging to the next developmental level
- Unable to rate this measure due to extended absence

- Unable to rate this measure due to extended absence
### Developmental Domain: COG — Cognition, Including Math and Science

#### COG 1: Spatial Relationships
Child increasingly shows understanding of how objects move in space or fit in different spaces

<table>
<thead>
<tr>
<th>Mark the latest developmental level the child has mastered:</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Responding</strong></td>
</tr>
<tr>
<td>Earlier</td>
</tr>
<tr>
<td>Moves body parts in basic ways</td>
</tr>
</tbody>
</table>

**Possible Examples**

- Moves hand to mouth.
- Lifts head from an adult's shoulder.
- Stretches while lying on back.

- Turns toward an adult who enters the room.
- Watches and tracks a moving object.
- Lifts arms toward an adult as the adult reaches down to pick child up.

- Tries to squeeze body between a chair and the legs of a table to get a toy.
- Fills a purse or bucket, sometimes until it is overflowing.
- Rotates a puzzle piece that has a large knob, while trying to fit it into a space on a wooden puzzle.

- Attempts to put a star-shaped piece into the square-, triangle-, and star-shaped openings of a shape sorter.
- Repeatedly rolls various objects down a ramp.
- Changes directions to move around several obstacles while pushing a toy shopping cart.

- Chooses puzzle pieces that are approximately the right size and shape to fit into a puzzle.
- Stacks a few nesting cups on top of each other to create a tower, with the largest cup on the bottom and smaller ones on top.
- Maneuvers a ride-on toy (without pedals) around people and objects on the playground, sometimes bumping into things.

- Moves around people and objects in the classroom, using a mobility aid, such as a walker.
**Developmental Domain: COG — Cognition, Including Math and Science**

**COG 2: Classification**

Child shows an increasing ability to compare, match, and sort objects into groups according to their attributes.

### Mark the latest developmental level the child has mastered:

<table>

<tr>
<td>Attends to people, objects, or events</td>
<td>Interacts differently with familiar people and objects than with unfamiliar people and objects</td>
<td>Associates a person or object with another person or object, based on a similarity or relationship between them</td>
<td>Sorts objects into two groups based on one attribute, but not always accurately</td>
</tr>
<tr>
<td><strong>Possible Examples</strong></td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>• Looks at people’s faces.</td>
<td>• Looks for the hammer that goes with the pounding bench.</td>
<td>• Separates blocks into a blue pile and a green pile, leaving a few green blocks in the blue pile.</td>
<td>• Separates a pile of toy animals by kind (e.g., dogs, cats, and birds).</td>
</tr>
<tr>
<td>• Quiets in response to an adult’s voice.</td>
<td>• Looks at another child when the child’s parent walks into the room.</td>
<td>• Takes some apples out of a basket that contains apples and bananas while helping an adult prepare a snack.</td>
<td>• Puts crayons, pencils, and markers into different containers.</td>
</tr>
<tr>
<td>• Closes hand around an adult’s finger.</td>
<td>• Looks for baby bottle when playing with baby doll.</td>
<td>• Picks out some train cars from a box of toys.</td>
<td>• Sorts shoes based on color, and then sorts all of them again by shape or size.</td>
</tr>
<tr>
<td></td>
<td></td>
<td>• Selects the shovels from among toys in the sandbox.</td>
<td>• Sorts buttons by color, and then sorts all of them again by shape or size.</td>
</tr>
<tr>
<td></td>
<td></td>
<td>• Takes some apples out of a basket that contains apples and bananas while helping an adult prepare a snack.</td>
<td>• Sorts shoes based on color, and then re-sorts by type (e.g., slippers, boots, tennis shoes).</td>
</tr>
<tr>
<td></td>
<td></td>
<td>• Separates blocks into a blue pile and a green pile, leaving a few green blocks in the blue pile.</td>
<td>• Sorts flannel-board pieces by type (e.g., shoes, pants, and shirts), and then separates them by adult items and baby items.</td>
</tr>
<tr>
<td></td>
<td></td>
<td>• Sorts rocks into two piles, big and small, after a neighborhood walk.</td>
<td>• Separates tiles into four groups: blue circles, blue squares, red circles, and red squares.</td>
</tr>
<tr>
<td></td>
<td></td>
<td>• Picks out toy trucks from a basket of toys and sets them on a nearby shelf, and then picks out toy cars from the basket and sets them on a different shelf.</td>
<td>• Removes utensils from the play kitchen and sorts them into groups: big spoons, small spoons, big forks, and small forks.</td>
</tr>
<tr>
<td></td>
<td></td>
<td>• Separates a group of big squares and little squares into two piles by using eye gaze to indicate where an adult should put each square.</td>
<td>• Sorts the bin of interlocking blocks into several piles, first by color, then by shape (e.g., squares and rectangles).</td>
</tr>
</tbody>
</table>

- Child is emerging to the next developmental level
- Unable to rate this measure due to extended absence
### Developmental Domain: COG — Cognition, Including Math and Science

#### COG 3: Number Sense of Quantity

Child shows developing understanding of number and quantity

<table>
<thead>
<tr>
<th>Responding</th>
<th>Exploring</th>
<th>Building</th>
<th>Integrating</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Earlier</strong></td>
<td><strong>Later</strong></td>
<td><strong>Earlier</strong></td>
<td><strong>Middle</strong></td>

<tr>
<td>Responds to people or objects in basic ways</td>
<td>Responds to changes in the number of objects observed or interacted with</td>
<td>Demonstrates awareness of quantity</td>
<td>Uses number names, but not always correctly, in situations related to number or quantity</td>
</tr>
</tbody>
</table>

**Possible Examples**

- **Responding**
  - Looks at objects that are hanging from a mobile.
  - Calms in response to a familiar adult’s touch.
  - Turns toward a familiar adult’s voice.

- **Exploring**
  - Attends to one moving toy on a mobile, then to another.
  - Grasps one toy, and then lets go of it while reaching for another toy that has been introduced by a familiar adult.
  - Holds an object in each hand, and then touches the two objects together.

- **Building**
  - Communicates, “Dos,” (“Two,” in Spanish) and holds up two cups in the play kitchen.
  - Communicates, “One, two, five, one, two,” while pointing randomly to objects in a group.
  - Shows excitement when an adult offers another book.

- **Integrating**
  - Communicates, “Dos,” (“Two,” in Spanish) and holds up two cups in the play kitchen.
  - Communicates, “One, two, five, one, two,” while pointing randomly to objects in a group.
  - Shows excitement when an adult offers another book.

---

○ Child is emerging to the next developmental level
○ Unable to rate this measure due to extended absence
### COG 4: Number Sense of Math Operations

Child shows increasing ability to add and subtract small quantities of objects

**Possible Examples**

<table>
<thead>
<tr>
<th>Responding</th>
<th>Exploring</th>
<th>Building</th>
<th>Integrating</th>
</tr>
</thead>
<tbody>
<tr>
<td>Earlier</td>
<td>Later</td>
<td>Earlier</td>
<td>Middle</td>

<tr>
<td>There are no earlier levels for this measure</td>
<td>Demonstrates awareness of quantity</td>
<td>Demonstrates understanding that adding objects to a group makes more or that taking away objects makes fewer or less</td>
<td>Identifies the new number of objects after one object is added to or removed from a set of two or three objects</td>
</tr>
</tbody>
</table>

- **Responding**
  - Gestures for more when playing with play dough.
  - Dumps small cars out of a bucket.
  - Communicates, “All gone,” after noticing that there is no more fruit in the bowl.

- **Exploring**
  - Puts objects in a dump truck or container, dumps them out, then puts them back in one at a time.
  - Moves toy farm animals into and outside of a toy barn while playing with the farm set.
  - Takes objects from two different piles to create a new pile by using a touchscreen tablet or computer.

- **Building**
  - Notices when another child’s bowl has more crackers than own bowl, and asks an adult to add crackers to own bowl.
  - Communicates, “Ahora tenemos más,” [“Now we have more,” in Spanish] when an adult combines markers from the shelf with some on the table.
  - Communicates, “They’re almost gone,” after taking the next-to-last unit block out of the basket.

- **Integrating**
  - Communicates, “Now we have three,” when adding a third snail to the two collected from the yard.
  - Communicates, “Only two left,” when an adult removes a broken wagon from a group of three wagons.
  - Gives one of two cars to another child, and then communicates, “Tôi có một cái và bạn có một cái,” [“I have one and you have one,” in Vietnamese].

- **Possible Examples**
  - Communicates, “I had four hair clips, but I gave one to my sister. Now I have three.”
  - Brings six napkins to the table after an adult communicates, “We usually have four children, but today we have two visitors, so how many napkins do we need altogether?”
  - Holds up five fingers and then one finger, counts them, and communicates, “Six,” when asked, “If you had five crackers, and you took one more, how many crackers would you have?”

○ Child is not yet at the earliest developmental level on this measure
○ Child is emerging to the next developmental level
○ Unable to rate this measure due to extended absence
**Developmental Domain: COG — Cognition, Including Math and Science**

**COG 5: Measurement**

Child shows an increasing understanding of measurable properties such as size, length, weight, and capacity (volume), and how to quantify those properties.

### Mark the latest developmental level the child has mastered:

- **Responding**
  - Responds to sensory information by moving body or limbs to reach for or move toward people or objects
  - Responds to sensory information or input (e.g., visual, auditory, tactile) with basic movements of body parts

- **Exploring**
  - Uses sensory information to control body while exploring people, objects, or changes in the physical environment
  - Demonstrates awareness of major body parts by exploring their movement potential

- **Building**
  - Tries different ways to coordinate movements of large or small body parts
  - Adjusts, with adult guidance, aspects of movement (e.g., effort, spatial, directional) in relation to people and objects

- **Integrating**
  - Anticipates and then adjusts, on own, aspects of movement (e.g., effort, spatial, directional) during new activities, in changed environments, or on different surfaces
  - Anticipates and then adjusts aspects of movement (e.g., effort, spatial, directional) during new activities, in changed environments, or on different surfaces

#### Possible Examples

- Responds to sensory information or input (e.g., visual, auditory, tactile) with basic movements of body parts
- Responds to sensory information by moving body or limbs to reach for or move toward people or objects

- **Responds to sensory information or input (e.g., visual, auditory, tactile) with basic movements of body parts**
  - Turns head in response to a light being turned on.
  - Quiets in response to an adult singing.
  - Responds to being touched on the cheek.

- **Responds to sensory information by moving body or limbs to reach for or move toward people or objects**
  - Moves toward a familiar adult while being picked up.
  - Quiets in response to an adult singing.
  - Responds to being touched on the cheek.

- **Uses sensory information to control body while exploring people, objects, or changes in the physical environment**
  - Shifts body to stabilize it, in order to reach up toward an adult’s face while sitting on the adult’s lap.
  - Repositions body in order to manipulate levers and buttons on a busy box.
  - Dabs fingers in water before placing whole hand in.
  - Pats play dough with whole hand, then leans forward to roll it.

- **Demonstrates awareness of major body parts by exploring their movement potential**
  - Participates in songs or games requiring movement of specific body parts.
  - Changes movements when dancing with scarves.
  - Starts and stops movements of different body parts during a freeze-dance game.

- **Tries different ways to coordinate movements of large or small body parts**
  - Avoids bumping into orange cones on a path for wheel toys by moving around them, after an adult points to the cones.
  - Raises knees high when following an adult marching.
  - Moves over, under, around, and through large objects in an obstacle course, sometimes bumping them.

- **Adjusts, with adult guidance, aspects of movement (e.g., effort, spatial, directional) in relation to people and objects**
  - Changes pathway of movement from straight to curved or zigzag when following another child during a game of follow the leader.
  - Pedals a wheel toy harder to go faster when catching up to another child on a wheel toy.

- **Anticipates and then adjusts aspects of movement (e.g., effort, spatial, directional) during new activities, in changed environments, or on different surfaces**
  - Moves over, under, around, and through large objects in an obstacle course, sometimes bumping them.
  - Walks carefully after slipping on wet leaves or grass during a nature walk.

- **Anticipates and then adjusts aspects of movement (e.g., effort, spatial, directional) during new activities, in changed environments, or on different surfaces**
  - Changes pathway of movement from straight to curved or zigzag when following another child during a game of follow the leader.
  - Pedals a wheel toy harder to go faster when catching up to another child on a wheel toy.

- **Horizons for Learning: Perceptual-Motor Skills and Movement Concepts**
  - Participates in songs or games requiring movement of specific body parts.
  - Changes movements when dancing with scarves.
  - Starts and stops movements of different body parts during a freeze-dance game.

- **PD-HLTH 1**
  - Perceptual-Motor Skills and Movement Concepts

<tr>
<td>Moves in basic and often involuntary ways</td>
<td>Uses arms, legs, or body to move toward or reach for people or objects</td>
<td>Uses arms, legs, or body to engage in simple, repeated actions on objects</td>
<td>Uses arms, legs, or body in various ways to manipulate objects, while in positions such as sitting, moving on all fours, or upright, using support</td>
</tr>
</tbody>
</table>

#### Possible Examples

**Responding**
- Kicks legs.
- Extends arm.
- Flexes foot.
- Kicks against a nearby object.
- Rolls onto side, toward an object, while lying on a blanket.
- Reaches toward a familiar adult, using both arms.
- Bangs a cup on a table.
- Splashes in water.
- Kicks table leg while seated for snack.
- Moves to a ball, pushes it away, then moves toward it and pushes it again.
- Puts up and drops blocks while holding onto a low table.
- Sits with legs apart and traps a rolling ball with arms.
- Moves toward a large container while holding onto a beanbag, and then drops beanbag inside the container.
- Crawls under table to retrieve a block; then crawls back out while holding the block.
- Raises arm to throw a beanbag without moving feet, but loses balance.
- Approaches a stationary ball, stops, and pushes ball with foot, then steadies self.
- Catches a ball while in a stationary position, using arms to bring it in and hold it against body.
- Practices throwing a ball by bringing it behind the head, sometimes dropping it but continuing the arm motion.
- Bends knees and jumps up to move a parachute or bed sheet that is also being held by others, sometimes losing grasp.
- Swings leg back to kick a stationary ball while standing in place.
- Hands out carpet squares to peers at circle time, sometimes dropping them.
- Catches a stuffed animal, with hands, keeping arms extended, and then uses hands to hold onto it.
- Strikes a ball off a cone, using a bat, with a horizontal swing and rotation of upper trunk.
- Reaches up to take a hat off a hook, pauses to regain balance, and then puts hat on head.

**Integrating**

</tr>
</tbody>
</table>
| Possible Examples:  
- Curls fingers around an adult’s finger.  
- Brings fist to mouth.  
- Makes small movements of arms and hands near the sides of body.  
- Holds a stuffed toy against body.  
- Pulls an object closer, using a raking motion.  
- Pushes hands against an adult.  
- Uses fingers and palm to grasp toys of different shapes or sizes.  
- Holds a stacking ring with full fist.  
- Holds a spoon with full fist while being fed by an adult with another spoon.  
- Lifts a cup to mouth with both hands, but may spill some.  
- Scribbles back and forth on pavement with sidewalk chalk, using one hand.  
- Grasps and turns a doorknob, but may not have strength or coordination to open the door.  
- Holds play dough with one hand while cutting it with a wooden knife.  
- Steadies a container of block accessories on lap while picking out the tree-shaped blocks.  
- Scoops sand into a container with one hand while holding the container with other hand.  
- Uses scissors to cut out simple shapes (e.g., circle, square) on paper.  
- Pushes a cord through a large bead, using one hand, while moving the bead onto the cord with the other hand.  
- Peels a banana or orange after adult starts the peel.  
- Unfastens buckle on chest strap of wheelchair.  
| **Earliest** | **Middle** | **Later** | **Earliest** |
| Possible Examples:  
- Curls fingers around an adult’s finger.

- Pushes a cord through a large bead, using one hand, while moving the bead onto the cord with the other hand.  
- Peels a banana or orange after adult starts the peel.  
- Unfastens buckle on chest strap of wheelchair.  
| Takes a cap off of a marker by twisting with one hand, then pulling with both hands in opposite directions.  
- Starts the peel on a banana or mandarin orange.  
- Unfastens buckle on chest strap of wheelchair.  
- Fastens snaps on pants made of thicker, stiffer materials, such as denim jeans.  
- Makes a necklace by stringing a variety of small beads with narrow holes.  
- Uses a computer mouse to draw details of a picture on a computer screen.  
- Rotates pencil within the hand to use the eraser when scribbling with a pencil.  
- Uses scissors to cut more challenging materials such as fabric or cardstock during an art activity.  

---

* Children who do not have use of one or both hands may still be rated as demonstrating mastery at a level if they can accomplish the functional intent of the descriptor using other body parts, or prosthetic devices.

**Fine Motor Manipulative Skills**

Reacts to unpleasant stimulation or events in basic ways
- Responds to situations that make child feel unsafe
- Seeks to make contact with familiar adult
- Follows adults’ guidance about basic safety practices
- Follows basic safety practices on own in familiar environments, with occasional adult reminders
- Applies basic safety practices on own across different situations
- Communicates an understanding of some safety practices to others

**Possible Examples**

- Starts after hearing a loud noise.
- Closes eyes in response to a bright light.
- Cries when touched by a cold washcloth.
- Turns away from an unfamiliar adult and moves toward a familiar adult.
- Looks to a familiar adult before moving down a ramp.
- Cries and looks for a familiar adult for comfort after falling down.
- Stops running and walks after a familiar adult communicates, “Use walking feet.”
- Puts the classroom pet gently when a familiar adult communicates, “Gentle touches.”
- Accepts a familiar adult’s hand and holds it when requested to before crossing the street.
- Stops and reaches for an adult’s hand when approaching a crosswalk.
- Tries to buckle own seat belt as an adult buckles other children in a multi-child stroller.
- Seeks adult assistance to use a step stool in order to obtain an object out of reach.
- Cleans up spills during a cooking activity.
- Waits turn to climb ladder on outside play equipment, with an adult reminder.
- Slows tricycle as a peer approaches.
- Stays behind the boundaries set up by adults to designate the swing-set area.
- Follows classroom safety rules when using scissors, such as holding scissors with blade pointed down.
- Brings helmet for an adult to put on child’s head before riding a tricycle on a family walk.
- Explains, “I wait for the walk sign and hold my mom’s hand before I cross the street.”
- Holds out arm to stop a peer from walking through a spill on the floor.
- Communicates, “Slow down! No running inside!” to a peer.

* Children at the Building Later and Integrating Earlier levels still need adult supervision to carry out safety practices on their own.

<td>Middle</td>
<td>Later</td>
<td></td>
</tr>
<tr>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

**Possible Examples**

- **Responding**
  - Responds in basic ways during personal care routines that involve hygiene
  - Responds in ways that demonstrate awareness of a hygiene routine
  - Participates in own hygiene routines, with an adult
  - Anticipates one or two steps of own hygiene routines, with specific adult guidance or demonstration
  - Carries out some steps of own hygiene routines, with specific adult guidance or demonstration
  - Carries out most steps of familiar hygiene routines, with occasional reminders of when or how to do them
  - Initiates and carries out most steps of familiar hygiene routines on own
  - Initiates and completes familiar hygiene routines on own

- **Earlier**
  - Child responds to personal care routines, with an adult
  - Child initiates personal care routines, with an adult

- **Middle**
  - Child/young child initiates and completes familiar hygiene routines on own

- **Later**
  - Child/young child initiates and completes familiar hygiene routines on own

**Possible Examples**

- **Responding**
  - Looks at an adult’s face, or quiets, during a diaper change.
  - Closes eyes when face is washed.
  - Kicks legs during a diaper change.
  - Attends to an adult's actions during diapering routine.
  - Grabs for the washcloth as an adult washes child’s face.
  - Shows excitement during bath time.
  - Pulls at diaper or pants when diaper needs to be changed.
  - Puts hands under a faucet before an adult starts to turn on the water.
  - Turns head toward or away from a tissue when an adult tries to wipe child’s nose.
  - Communicates to an adult the need for help with toileting or for a diaper change.
  - Rubs hands together under a faucet after an adult turns the water on.
  - Tries to blow nose into a tissue held by an adult.
  - Lines up at sink to wash hands before lunch time.
  - Uses toilet (pulls down pants, sits, etc.), but may need an adult’s assistance with wiping.
  - Gets a tissue and wipes own nose, with adult guidance to then throw tissue away and wash hands.
  - Gets own toothbrush and gives it to an adult after meals when asked.
  - Uses the toilet on own, and flushes after adult reminder.
  - Washes and partially dries hands, and then dries them completely when suggested to by an adult.
  - Gets toothbrush, runs it under a faucet, holds it for an adult to squeeze toothpaste on, and brushes teeth.

- **Earlier**
  - Uses toilet on own, sometimes forgetting to do one step, such as washing hands.
  - Washes hands before eating and usually remembers to use soap.
  - Uses toilet on own, completing all steps, including washing hands.
  - Coughs and sneezes into elbow most of the time.
  - Goes to brush teeth after lunch, brushes teeth, and puts away toothbrush on own.

- **Middle**
  - Uses toilet on own, completing all steps, including washing hands.
  - Washes hands before eating and usually remembers to use soap.
  - Uses toothbrush, runs it under a faucet, holds it for an adult to squeeze toothpaste on, and brushes teeth.

- **Later**
  - Washes hands before eating and usually remembers to use soap.
  - Uses toothbrush, runs it under a faucet, holds it for an adult to squeeze toothpaste on, and brushes teeth.

- **Conditional Measure**
  - Measure not rated: this measure is not used for documenting progress or planning this child’s learning activities and supports. (Required for children with IEPs)
### Developmental Domain: PD-HLTH — Physical Development–Health

**PD-HLTH 7: Personal Care Routines: Feeding**

Child responds to feeding and feeds self with increasing proficiency

<td></td>
<td>Engages in active physical play for short periods of time</td>
<td>Engages in active physical activities or play for sustained amounts of time</td>
<td>Seeks to engage in active physical activities or play routinely, with increased intensity and duration</td>
</tr>
</tbody>
</table>

#### Possible Examples

- **Responding**
  - Pushes a wheeled toy for a short distance.
  - Climbs up a small slide, sits down, slides, and then goes to another activity.
  - Puts toys in a wagon and pulls the wagon around the room.
  - Lies prone on a scooter board and uses hands to push self around the room.
  - **Middle**
    - Hops with two feet, pauses, and then hops again, while pretending to be a bunny.
    - Runs to the ladder of a slide outdoors, climbs the ladder, and slides.
    - Holds a drum and marches with a peer during part of a song.
- **Building**
  - Jumps, moves, and waves a streamer in different ways while moving around the playground in a parade.
  - Joins a group of peers kicking and chasing a soccer ball around a play yard.
  - Joins in a dance started by a peer and then dances until the song ends.
  - Rides around the bike trail several times, increasing speed to pass a peer.
  - Races to the fence and back several times, while using a mobility device (e.g., walker, crutches, wheelchair).
- **Integrating**
  - Creates an obstacle course with peers and challenges others to see who can move the fastest through the course two times.
  - Joins a group of children playing chase, while propelling own wheelchair.
  - Initiates a dance activity, keeping up with a fast beat until the music ends.
  - Joins a group of children kicking and chasing a soccer ball around a play yard.

*Intensity of active physical play and amount of strength required to engage in the activity will vary greatly from child to child. When observing a child, it is important to consider the child’s capacity for engaging in vigorous active physical play, in which a child’s heart is beating faster and the child is breathing harder than is typical for the child when engaged in daily activities or routines.*

**Possible Examples**

- **Responding**
  - There are no earlier levels for this measure

- **Exploring**
  - Shows a preference for several favorite foods
  - Shows interest in a variety of foods
  - Recognizes or identifies a variety of foods

- **Building**
  - Demonstrates knowledge of the characteristics of a variety of foods
  - Shows awareness that some foods are more healthful than others

- **Integrating**
  - Communicates simple explanations about the healthfulness of different food choices

- **Child is not yet at the earliest developmental level on this measure**
- **Child is emerging to the next developmental level**
- **Unable to rate this measure due to extended absence**

#### Possible Examples

- Selects a banana when offered choice between a banana and a cracker.
- Selects applesauce when offered a choice between applesauce and yogurt.
- Points or gestures towards milk when offered a choice between water and milk.
- Accepts a variety of foods offered from a serving plate.
- Explores unfamiliar foods that are placed on a plate.
- Observes others’ reactions when they eat food items that are unfamiliar to child.
- Communicates, “Me gustan las bananas y las manzanas,” [“I like bananas and apples,” in Spanish] when selecting bananas and apples from a plate of sliced fruit.
- Identifies several pretend food items when playing restaurant with a peer.
- Makes different pretend food items, such as a tortilla and a pizza, with play dough.
- Communicates, “This rice is sticky.”
- Communicates, “I like mangos. They’re sweet.”
- Purses lips together and shakes head, “No,” when offered a slice of lemon to taste while making lemonade.
- Communicates, during pretend play, “First we eat vegetables, and later we can have dessert.”
- Chooses primarily pictures of fruits and vegetables to create a collage of healthful foods.
- Chooses to drink water instead of lemonade during snack time.
- Communicates, “Sabi ng mama ko ay lalaki ako at lalakas kung kakain ako ng beans,” [“My mama said that I will grow big and strong if I eat my beans,” in Tagalog].
- Communicates, “Broccoli is good for you,” when eating broccoli.
- Communicates, “Milk is good for my teeth.”
- Brings pretend soup to a peer who is pretending to be ill, to make the peer feel better.
- Communicates, “Sabi ng mama ko ay lalaki ako at lalakas kung kakain ako ng beans,” [“My mama said that I will grow big and strong if I eat my beans,” in Tagalog].
- Communicates, “Broccoli is good for you,” when eating broccoli.
- Tells a peer, “Milk is good for my teeth.”
- Brings pretend soup to a peer who is pretending to be ill, to make the peer feel better.
- Communicates, “Sabi ng mama ko ay lalaki ako at lalakas kung kakain ako ng beans,” [“My mama said that I will grow big and strong if I eat my beans,” in Tagalog].
- Communicates, “Broccoli is good for you,” when eating broccoli.
Glossary of Terms and Phrases Used in the DRDP (2015)

**Assemblage:** An artistic composition made from scraps, junk, or odds and ends.

Appears in VPA 1: Visual Art

**Investigates/Investigation:** In the process of scientific inquiry, asking a question and conducting systematic observations or simple experiments to find an answer.

Appears in:
COG 9: Inquiry Through Observation and Investigation
COG 10: Documentation and Communication of Inquiry

**Locomotor Skills:** The ability to project the body into or through space.

Appears in:
PD-HLTH 2: Gross Locomotor Movement Skills
PD-HLTH 3: Gross Motor Manipulative Skills

**Manipulative Skills:** Also known as object-control skills in which the arms, hands, legs, and feet are used to give force to an object (for example, throwing a ball) or to receive and absorb the force from an object (for example, catching a ball).

Appears in PD-HLTH 3: Gross Motor Manipulative Skills

**Observe / Observation:** Gathering information about objects and events by using the senses of sight, smell, sound, touch, and taste and noticing specific details or phenomena that ordinarily might be overlooked.

Appears in:
COG 9: Inquiry Through Observation and Investigation
COG 10: Documentation and Communication of Inquiry

**Onset:** The first consonant or consonant cluster in a syllable (e.g., the *h* in the one-syllable word *hat*; the *m* and *k* in the two syllables in the word *monkey*).

Appears in LLD 8: Phonological Awareness

**Rime:** A linguistic term that refers to the portion of a syllable that starts with a vowel. In the word *big*, the rime unit is /ig/. In the word *bring*, the rime unit is /ing/.

Appears in LLD 8: Phonological Awareness

Appendix B: 
Resources for Assessing Children who are Dual Language Learners with the DRDP (2015)

The DRDP (2015) takes into consideration the specific cultural and linguistic characteristics of California's diverse population of young children, with specific consideration for children who are young dual language learners. The introduction in the DRDP (2015) Assessment Manual provides information on completing the assessment with young children who are dual language learners. Keep in mind that young dual language learners may demonstrate knowledge and skills in their home language, in English, or in both languages. Communication in all languages the child uses should be considered when collecting documentation and completing the measures in all domains of the DRDP (2015).

The following resources will increase your knowledge and help you better complete the DRDP (2015) for young children who are dual language learners.

Appendix C: Strategies for Observation and Documentation

The DRDP (2015) is administered through observation in natural settings by teachers and other service providers in the classroom or center and by family members in home and community settings. Observations are embedded into typical, ongoing routines and activities throughout the day. The process of observation requires planning in advance on the part of teachers and service providers. As you review the measures of the DRDP (2015), consider specific routines or activities during the day where you would be able to observe more than one measure or more than one child.

Strategies for Effective Observation

Observation should be ongoing throughout the year. The assessment windows for the DRDP (2015) provide a period of time to make sure teachers and service providers have sufficient documentation for each of the measures in time to submit DRDP data. To rate a child’s behavior, teachers and service providers should use naturalistic, or authentic, observation strategies. Below are several key points to support naturalistic observations. You will find additional information about naturalistic assessment by viewing the short video, What is Authentic Assessment at draccess.org/guidancefordrdp. Many observation and documentation job aids can be found at desiredresults.us/teachers. You will also find a training DVD, Getting to know You Through Observation, at wested.org/resources/getting-to-know-you-through-observation that can be used by ELCD and other administrators to train staff.

Strategies for Effective Documentation

A variety of methods are available for recording information gathered through naturalistic observations, including:

- **Anecdotal Records** – An anecdotal record is a written note about what a child does or says during a typical or routine activity. Anecdotal records result in brief descriptions of the behavior observed.

- **Event recording (tallies)** – In event recording, the observer records each instance of the behavior being observed so that an indication of frequency is obtained. Usually this is done with tally marks but may also be recorded using a code such as “+” for correct and “-” for incorrect.

- **Checklists** – Checklists are lists of specific skills or behaviors that can be used during observation to check off the behaviors observed with a group of children.

- **Rating Scales or Rubrics** – Rating scales and rubrics are similar to checklists in that they include lists of behaviors but they also include additional descriptive information about the behavior such as how well, how frequently or how independently the behavior occurred.

10 Strategies for Naturalistic Observation

**Know the instrument** – Be familiar with the instrument, including the domains and measures being observed.

**Observe naturally** – Observe the child in the context of typical routines and activities, interacting with familiar people, in familiar places, and with familiar materials.

**Observe objectively** – Focus on what the child does. Be as objective and detailed as possible. Avoid using labels, qualitative descriptors, or stereotypic expectations that may bias your observations.

**Observe strategically** – Observe for skills that correspond to the DRDP measures and record your observations. You may be able to gather information on more than one measure during one observation.

**Observe daily or routinely** – When observations are part of the daily routines, children become accustomed to being observed and seeing notes being recorded.

**Observe variety and consistency** – Be aware of a child’s overall performance, even when focusing on a single aspect of behavior. Observe the child over time and during different routines and activities.

**Be specific and complete** – Intentionally and purposefully record the specific details of what you actually observe as soon as possible. Details are important and might be easily forgotten.

**Plan ahead** – Plan for observations as part of weekly lesson planning. Plan to observe during activities that do not require your full assistance or plan for someone else to observe and document.

**Allow time** – Allow adequate time for the child to complete any task that he or she is engaged in even if it requires more time than one might expect.

**Use appropriate adaptations** – Ensure that appropriate adaptations as determined by the IFSP or IEP team are in place when observing the child.

- **Work Samples** – Documentation can also include the collection of 2- or 3-dimensional products that children have produced such as drawings, writing on paper or 3-dimensional constructions the child has made for example with play dough or other materials.

- **Videos or Photographs** – Cameras can be used to document observed behaviors of children through videos or still photographs.

Information on strategies for implementing the above documentation strategies can be found at: eclkc.ohs.acf.hhs.gov/hslc/tta-system/teaching/practice/iss-library.html
Consider the following for planning and collecting documentation:

- Choose methods of documentation that can be embedded into a program’s environment, structure, and routines.
- Plan ahead for materials needed for documentation such as sticky notes or pre-printed labels with children’s names for anecdotal records or clipboards with checklists or rubrics. Materials should be strategically located throughout the classroom.
- Observe children’s behaviors throughout the day and record documentation while observing.
- Date each piece of evidence for future reference.
- Collect documentation over time. Documentation over time strengthens the validity of ratings.
- Organize the documentation collected immediately after collecting it.
- Keep assessment information confidential. Store the DRDP materials, including notes, in a secure location to ensure confidentiality for each child.

Organizing Documentation

Portfolios: Portfolios are a helpful way of organizing information. ELCD programs are required to use a form of portfolio to organize documentation. Portfolios may contain anecdotal notes, children’s work samples, photos of children’s activities, audio or video recordings, and transcripts of the child’s language. The portfolio methods selected should work well for the program.

Electronic Portfolios: If notes are entered into a computer, an electronic portfolio can be produced to summarize the evidence. Please check with a local administrator for procedures regarding consent for photography and video.

Collaboration to Support Effective Documentation

A central goal for teachers and service providers who use the DRDP (2015) is to obtain measures of the child’s developmental progress based on typical day-to-day behaviors. It is difficult to imagine one individual having access to all of the many learning opportunities that a child encounters throughout each day. Therefore, it is very helpful to seek input from individuals who have ongoing contact and who know the child well in order to obtain the most complete and accurate picture of the child’s skills and abilities. It is important to consider how and when collaborating with others will support and help to inform the accurate rating of measures for the DRDP (2015).

Although direct observation of a child is the primary method used to inform ratings, other sources of evidence should be used to supplement observations. Gathering information from others who know the child well such as family members, caregivers, or other service providers often provides a wealth of additional information about a child’s skills, knowledge, and behaviors. This also provides the additional benefit of observations across different settings. There are numerous ways that others can collaborate in sharing information such as written observations, conversations that focus on a child’s development, or viewing short videos or recordings that illustrate a child’s behavior in typical routines and activities.

Planning ahead can make the process of collaboration more helpful. Identify early on in your relationship with the child’s family, who else might provide helpful information to assist in documenting their child’s development. Make sure that the family is well informed about the purpose of the DRDP (2015) and the important role that they can play in sharing their observations about their child. With the family’s permission, communicate with other individuals who know the child and strategize with them how they might be able to share information with you.

Communication is key to successful collaboration. For a more detailed look at collaboration and the assessment process please refer to Appendix F.
Appendix D:
Comprehensive Definitions of Adaptations to be Used with the DRDP (2015)

Adaptations are changes in the environment or differences in observed behavior that allow children with Individualized Family Service Plans (IFSPs) or Individualized Education Plans (IEPs) to demonstrate their knowledge and skills in their typical environments. Adaptations that are in place for the child during the normal course of the day should also be in place during observations for the DRDP (2015). New adaptations should not be introduced solely for the purpose of conducting an assessment. Seven broad categories of adaptations are used with the DRDP (2015). This is the same system of adaptations developed for and used in the DRDP.

1. Augmentative or Alternative Communication Systems

Augmentative and alternative communication systems are methods of communication other than speech that allow a child who is unable to use spoken language to communicate with others. An augmentative communication system is used to augment or facilitate the development of speech. An alternative communication system is used in place of speech. Some examples include sign language, picture cards, and electronic communication devices. Assessors should use these systems as part of the observation of a child using language in a natural context. Assessors should not just elicit responses or contrive adult-directed situations.

If American Sign Language is the child’s primary language, it is designated as the home language, and not an adaptation. If sign language is used as a bridge to learning verbal language, then it is considered an adaptation.

2. Alternative Modes for Written Language

Alternative Modes for Written language are methods of producing written language used by a child who cannot see well enough or cannot hold and manipulate a writing utensil well enough to produce written symbols. If a child cannot see or cannot hold a pencil or marker, this adaptation may be used to assist in reading or writing, or emergent reading or writing. Examples of this adaptation include using a Braillewriter, keyboard, or computer.

Naturally, preschool-age children are not proficient at reading and writing. This adaptation allows for children to explore reading and writing and develop their skills in a developmentally appropriate manner.

3. Visual Support

Visual supports are adjustments to the environment that facilitate a child’s ability to see or to understand the surrounding environment or events. Acceptable visual supports include:

- Adjustments in contrast
- Adjustments in lighting
- Distance from objects
- Increased size of materials
- Verbal description of events

4. Assistive Equipment or Devices

Assistive equipment or devices are tools that make it possible or easier for a child to perform a task. The child should be familiar with the use of the device. Any type of adaptive equipment or assistive device that the child needs for mobility, positioning or manipulating objects is acceptable, including:

- Walkers
- Standers

5. Functional Positioning

Functional positioning enables postural support that allows a child to have increased control of his body. It is important that positioning devices are available to the child across settings so that the child may access daily routines and activities and so they may be observed in a variety of activities. Some examples include:

- Standers
- Cube chairs
- Tricycles with seat belts and built-up pedals

6. Sensory Support

Sensory support includes either increasing or decreasing sensory input to facilitate a child’s attention and interactions in the environment. Some children may need increased sensory input and others may need decreased input. Some children require different types of sensory support in different activities. Sensory support may include:

- Reducing background noise
- Adjusting tactile stimulation
- Adjusting visual stimulation

7. Alternative Response Mode

Using alternative response modes means recognizing that a child might demonstrate mastery of a skill in a way that differs from a typically developing child. For this adaptation, the environment is not modified as in the other adaptations. Rather, the child’s unique yet consistent responses that may indicate the presence of a skill are identified. For example, the child with autism may look out of the corner of his or her eye instead of establishing direct eye contact, or the child with a physical impairment may use atypical movement patterns. The form of a child’s response may differ from that of his peers and still be considered to demonstrate mastery of a skill.
Appendix E: 
Resources for Working in Partnership with Families

A central goal of the DRDP is to identify a child’s developmental progress based on typical, day-to-day behaviors. It is appropriate to seek input from individuals who have ongoing contact with the child and know the child well. Family members’ descriptions of their child’s behavior in the home or in community settings will help teachers and service providers know more about the child’s behaviors across settings, particularly for those skills the child may not demonstrate routinely in the educational setting; and help teachers and service providers obtain more comprehensive information in order to make accurate ratings for the DRDP (2015).

Family members may participate in the DRDP assessment in a number of ways:

• Inform the child’s teachers and service providers of the child’s history for a more complete picture of the child.
• Share the skills they see their child using in typical activities, and might share these skills via stories, photos, drawings, observations, and/or video clips.
• Share the child’s strengths, areas they wish to focus on, and areas of growth they observe.
• Become informed about the next steps in their child’s development.
• Help determine which adaptations will help their child participate in everyday activities (for children with an Individualized Family Service Plans (IFSPs) or Individualized Education Program (IEPs)) and share with the team adaptations the child uses at home, at school, and in other settings.

Below are resources to assist families in knowing more about the DRDP (2015) and the skills assessed as well as resources to assist teachers and service providers in working as partners with families in the assessment process.

Resources for Families

Overview of the DRDP (2015) for Families: 
draccess.org/OverviewOfDRDP2015forFamilies.html
A document describing how the DRDP (2015) works for children, including those with IFSPs and IEPs; and how it benefits families, children, providers, and programs.

All About Young Children: allaboutyoungchildren.org
A website for families describing skills that help children learn including how they learn language, how they learn about feelings and relationships, how they learn about numbers, and how they become skilful at moving their bodies. (Available in eight different languages.)

California MAP to inclusion and Belonging: 
cainclusion.org/camap/map-project-resources/county-specific-resources
The MAP Project website supports the inclusion of children with disabilities and other special needs ages birth to 21 in child care, after school and community settings. It includes links to resources on topics related to families and children with IFSPs and IEPs. The website contains a statewide interactive directory by county, of Family Resource Centers (FRC), Special Education Local Plan Areas (SELPAs), Regional Centers, Head Start, and more for families of children with IFSPs and IEPs.

Desired Results for Children and Families, Information for Families brochure: desiredresults.us/families
A brochure describing the Desired Results System for families.

Watching My Child Grow: desiredresults.us/families
A DVD that describes the Desired Results Assessment System and its benefits for all children and families from the voices of parents. Call 1-800-770-6339 or visit the website.

Resources for Teachers and Service Providers

A document that addresses the perspectives of parents and program staff in the sharing of child assessment information through the formation of partnerships and suggests strategies for bringing those perspectives together.

The Role of Family Observations: 
draccess.org/RoleOfFamilyObsv.html
A document describing the research findings that suggest parents’ observations are reliable and valid and should be considered an essential component of a comprehensive assessment process.

Supporting Children and Families Living in Homeless Situations

CDE Homeless Education website: www.cde.ca.gov/sp/hs/
The McKinney-Vento Act defines homelessness as individuals who lack a fixed, regular, and adequate nighttime residence. This definition also includes individuals who are sharing the housing of other persons due to loss of housing, economic hardship, or a similar reason; who may be living in motels, hotels, trailer parks, shelters, public or private place not designed for or ordinarily used as a regular sleeping accommodation for human beings; or who are living in cars, parks, public spaces, abandoned buildings, substandard housing, bus or train stations, or similar settings.

Homeless children and youths have the right to access the same free, appropriate public education, including public preschools, as provided to other children. The website above addresses these rights, and provides educational information and resources for families and educators.
Supporting Children in Foster Care

CDE Foster Youth Services website: www.cde.ca.gov/ls/pf/fy/
Children in foster care face significant barriers to positive educational experiences and academic achievement. A large percentage of children placed in foster care experience physical and emotional trauma as a result of abuse, neglect, separation from family, and impermanence. Although youth are placed in foster care for their safety, foster youth often do not find the security and stability they need through the foster care system. Most children who enter foster care have been exposed to many conditions that have undermined their chances for healthy development and learning.

On average, children who enter the foster care system have experienced more than 14 different environmental, social, biological, and psychological risk factors before coming into care, all impacting learning. These factors often include abuse and neglect, exposure to illicit drugs, and poverty. Once in foster care, they often experience other challenges to their well-being. They may be separated from their brothers and sisters, moved from one foster care placement to another, experience frequent changes in home placements or school placement, or caseworkers who may lack the resources to effectively advocate and plan for their best interests.

The California State Legislature recognizes that a high percentage of foster youth are working substantially below grade level, are being retained at least one year at the same grade level, and are becoming school dropouts. In response, the legislature declared that the instruction, counseling, tutoring, and provision of related services for foster youth be a state priority and mandated the Foster Youth Services Coordinating (FYSC) Programs through California Education Code sections 42920–42925. The Program provides services to all foster children and youth attending schools in each county.

The website addresses foster children's rights, and provides educational information and resources.

Appendix F:
Collaboration to Complete the DRDP (2015)

“The most valuable resource that teachers have is each other. Without collaboration our growth is limited to our own perspectives.” – Robert John Meehan

Collaborating with Others Who Know the Child Well
Our understanding of young children is strengthened when we commit to partnerships with individuals, including family members, who know the child well and in different settings. Collaboration in gathering and sharing information is important because it affords us windows into a child’s life and offers perspectives that enhance our understanding of a child’s skills and behaviors. Identifying and communicating with the individuals who can collaborate on rating the measures of the DRDP (2015) is an essential step in this process.

Through collaboration, early educators and special educators each bring their skills and perspectives. Early educators contribute by providing a picture of the child in the context of a classroom setting. Special education providers contribute by identifying perspectives on a child’s unique learning needs and specific understanding of a child’s disability including materials that should be available and adaptations that should be in place. This lays the foundation for teachers and service providers to complement one another’s work in assessing a child’s skills and development. Shared information can build relationships that lead to joint decision-making not only about the assessment process but also about curriculum, instruction, supports, and services that can build relationships that lead to joint decision-making not only about the assessment process but also about curriculum, instruction, supports, and services that

Collaboration to share assessment observations and evidence for completing the DRDP (2015) is built on relationships and a commitment to ongoing communication. It is developed over time with an understanding of each person’s role. Aim for multiple, informal strategies that can be used on a daily basis. Identifying mutual interests in supporting the child is important. Some questions that address joint interests include:

- What are the child’s goals?
- What specialized equipment or adaptations are used?
- How will the goals be infused into the child’s day and into learning activities?
- How will we know our strategies are working?

Collaborating with others in the assessment process is especially important in situations where the child is served by multiple providers. For example, a child may attend an early education program and also receive special education services, such as speech-language, occupational, and/or physical therapy. Early education teachers and special education providers can work hand-in-hand to complete the observations and DRDP (2015) ratings for children who are dually enrolled in both programs.

How this collaboration will take place – who will be involved and what roles each individual will play – will vary depending on the situation. Teachers and service providers have reported the following helpful strategies:

- sharing information, including observations, adaptations, curriculum and program goals, and IFSP outcomes or IEP goals
- providing anecdotal notes
- sharing work samples and portfolios
- reviewing reports of DRDP (2015) results together

Increasingly, teachers and providers are utilizing technology such as short video clips or recordings, with family permission, to share information and observations. The DRDP (2015) app helps teachers collaborate, as well as using technology such as email, phone conferences and free web conferencing platforms. Local policies on using devices should be followed and child information should not be sent via email.

The early education teacher and special education service provider responsible for completing the DRDP (2015) should each take the lead in partnering with others who work with the child. The general educator is responsible for entering DRDP data into DRDPtech. The special educator is responsible for reporting and entering the assessment data on children who have IEPs or IFSPs to the SELPA. However, except for data reporting, the assessment can be completed together by both educators, and a copy of the Rating Record held by each of them for their respective reporting. Suggestions to help get started working together include:

- Make an initial plan detailing areas to be observed directly and those areas in which others may have a more thorough knowledge of the child. The general education teacher can provide information on all domains. A speech-language therapist might inform measures in the Language and Literacy Domain. Families and special education providers including physical and occupational therapists are a good source of information for measures in the Physical Development and Health Domain.
- Contact the individuals who will collaborate to discuss the mutual goal of completing the assessment and to develop a plan for working together.
- Develop a timeline that is acceptable to all partners, including identifying deadlines and strategies to meet timelines.
- Collect any signature requirements for sharing child information from the family.
- Gather multiple perspectives and consider input from family and others who know the child during assessment.
- Determine when and how communicating about updates and results will occur.

Helpful strategies:

**Collaborating with Families**

Gathering family perspectives about their child's development and behavior provides important and valid data, which is useful for making informed assessment decisions. Research suggests that family observations are reliable and valid and should be considered an essential component of a comprehensive assessment process. Inviting parents and other family members to share observations of their child's development and behavior is required for ELCD programs and is good practice in all early childhood settings and programs.

When families collaborate with teachers and service providers in sharing their observations about their child's behaviors in the home or in community settings, it provides a richer and broader view of a child. Information from families helps to identify skills and behaviors that the child may not demonstrate routinely in the educational setting. For example, a teacher or therapist may not regularly observe a child's dressing or other self-help skills. However, families have repeated opportunities to observe their child's self-help skills both over time and in different settings. Parent observations support more accurate reporting about a child's skills.

**Strategies for gathering information from families include the following:**

- Make sure that families understand the skills and behaviors described in the DRDP (2015) measures. Teachers and service providers understand expected sequences of child development and are trained about how items on the DRDP (2015) reflect these sequences. Parents might not understand fully the meaning of measures without explanations or examples. It may be useful to provide families with examples of the kinds of behaviors to look for or the routines and activities that might provide a context for a behavior. For example, rather than ask a parent to describe a child's grasping pattern, inquire about how a child picks up small pieces of cereal during mealtime.

- It is reasonable for the observations of parents and practitioners to differ across the range of behaviors being rated. A child's behavior during activities and routines that occur in the classroom setting may differ from the same child's behavior in activities and routines in home or community settings. Not all perspectives about children's behavior based on parent or practitioner observations will be congruent. Rather, aim for convergence or the pooling of perspectives from all who know the child and have had repeated opportunities to observe behavior in different settings.

The ongoing conversations that we have with family members during our typical interactions with them are rich opportunities for learning about their child. Leading a focused conversation with a family is particularly important to obtain information on measures that you have not had the opportunity to observe. During these conversations, focusing on routines and activities provides a very useful context for asking a family about their child's everyday learning opportunities and skills. The four steps in the resource listed below will guide you in planning and leading focused conversations with families to help complete the DRDP (2015). If this is the first DRDP (2015) assessment that you will be completing with a particular child, be sure that you have spent enough time getting to know the child by observing the child's skills during typical routines/activities and by having conversations with the family.
