

# From Data to Story: Showcasing Growth with the DRDP in the IEP

**Interactive virtual session**

**Wednesday, April 23rd 2025, 2:00 - 3:30 PM**

DR Access is delighted to partner with the High Quality IEPs project to bring you this interactive virtual session! As the school year comes to a close, how can you use the Desired Results Developmental Profile (DRDP) to showcase student progress in a meaningful way? This webinar will guide you through using the DRDP as a support to developing high quality IEPs—not just a procedural requirement.

In this session, you'll learn how to:

- Use the DRDP to highlight growth and progress over the year
- Create a final report of progress that connects to present levels in the IEP
- Prepare for transitions by crafting a story that supports the child

Join us for this interactive session to gain practical strategies, resources, and insights that will help you wrap up the year with confidence and set the stage for continued student success!
